THORNTON

HERITAGE TODD CREEK SUBDIVISION

From I-25 north, take the highway 7 exit and go east to Yosemite. Take a right on Heritage into the subdivision and take a left on Verbena Street opposite the clubhouse.

Don & Mary Lou Vollmer

15109 Verbena Street

This xeriscape, no turfgrass design features an Allan Block wall in the front. Decorative rock and boulders were placed on berms along with a shrub rose garden. Cobblestone, Western Sunset and small mulch areas break up the river rock. The backyard features a moss rock water feature, composite sitting wall, outdoor kitchen, stamped concrete patio and a composite stone gas firepit. Various perennials, grasses and ornamental trees highlight this low maintenance landscape.

Bob & Sue Nalbone

15079 Verbena Street

A buff flagstone wall and entranceway using flagstone in breeze accent this home. Granite boulders were installed on the berms, broadleaf evergreens and a variety of daisies were planted in the perennial areas.

Bob & Barb Munson

15069 Verbena Street

A wall complemented with cobblestone covered berms, decorative concrete curbing and annual flower splashes of color highlight the front yard while a low maintenance xeriscaped backyard includes a stamped concrete patio and Madera Block sitting wall.

Wayne Vandever & Alice Pico

15059 Verbana Street

An Allan Block planter was installed as an extension to the front patio. Berms and placed boulders were installed at the front and back areas where Aspens, Baby Blue Eyes Spruce, Bosnian pine and Concolor fir make for a varied assortment of trees. The xeriscaped backyard features an extension to the pre-existing concrete patio. A creamed coffee stain was applied to the front and back concrete areas for visual interest and seamless transition from previous to new work. An arched sitting wall around the patio creates an inviting place to join.

Ken & Harriet Gloss

15049 Verbana Street

This design includes a stamped concrete border along the driveway. A new sidewalk provides easy access to the rear of the house. The large stamped concrete patio at the back of the home includes a sitting wall for additional seating during gatherings. The owners interest in gardening called for an Allan Block raised planting bed area. Berms and boulders were installed and incorporate the owners collection of antique equipment. All installed concrete work is code compliant to specifications of the Americans with Disabilities Act (ADA).

HERITAGE TODD CREEK SUBDIVISION *(continued from previous page)*

Doug & Gene Willey

15021 Verbena Street

The front of this home features a decorative block wall with an entranceway. A stamped concrete walk invites the viewer to the front door. The backyard includes a stamped concrete patio and an assortment of plant material that provide color throughout the seasons.

Al & Norma Sugerman

15005 Verbena Street

The built-up berms at this residence include a Locust framing tree, euonymus and ornamental grasses. Wyoming Red 1.5" rock was added to break up the river rock in a low maintenance fashion. In the backyard a concrete patio was installed for outdoor entertaining.

Stan & Renee Bruske

14995 Verbena Street

A buff flagstone retaining wall was constructed then backfilled to create a level yard at the front of the home. The river rock color on the built-up berms is broken up by the addition of cobblestones, shredded, wind-resistant cedar mulch, pea gravel and black Mexican beach pebbles. The backyard features a concrete patio with a sitting wall made of Madera Block.

Glen & Eileen Minter

14951 Verbena Street

The front of this home has built-up berms with moss boulders and shrub roses. The backyard features a 700 square foot paver patio for outdoor living. A circular blend paver pattern was installed around the propane fire pit area surrounded by a raised sitting wall for cozy gatherings. A pondless moss rock water feature produces relaxing sounds of a mountain brook. Trees, shrubs and berms surround this area which overlooks the golf course.

John & Cheryl King

8562 E. 148 th Lane

Built-up berms and placed boulders create interesting elevation changes at the front of this home. The backyard includes a concrete patio and fire pit with a Madera Block sitting wall. A spire, upright rock fountain provides the relaxing sound of cascading waters.
