

SMALL INFRASTRUCTURE REPAIR

INNOVATION

EASY DIG
MODULAR TRENCH CAGES

LARGE MESSY EXCAVATIONS?

Small infrastructure repairs; such as curbstop or line repairs generally turn into a large excavation with a backhoe. Does a fully sidewalk repair and front lawn remediation after repairing 1 curbstop sound familiar? Turns into a full day or two of work along with a backhoe, large shoring and several men. This is not only a messy situation but can turn costly as well.

THE SOLUTION?

WHAT IS EASYDIG?

A 4ft diameter circular trench cage that is modular. Sections are under 50 lbs and clip together with 4 clips per section. They are easy to carry around and can be dug down with a hydrovac.
