

HOW EMISSIONS TESTING IS HELPING OUR AIR

Increased risk of cancer, birth defects, brain and nerve damage, cataracts

Acid rain, ground-level ozone that damages trees, wildlife and water

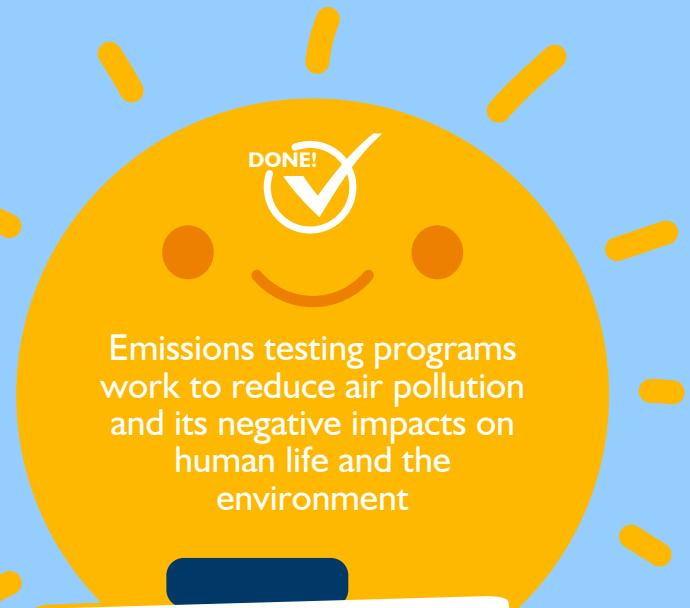

Georgia's Clean Air Force has:

IDENTIFIED
4.3M+

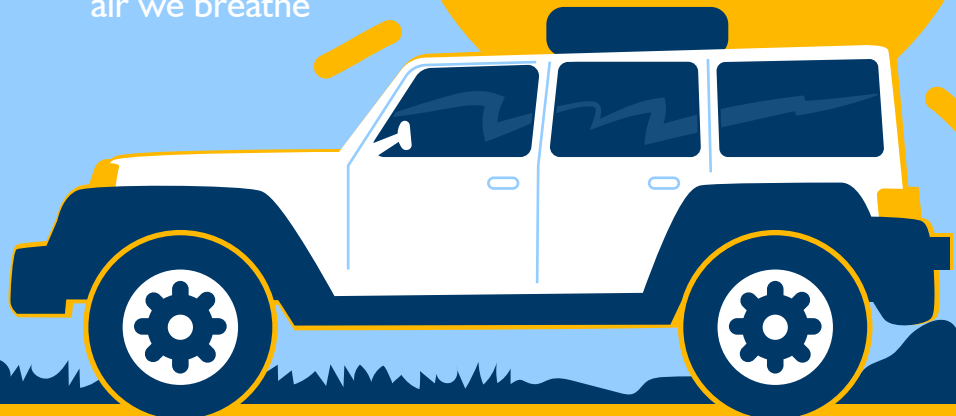

heavy-polluting vehicles needing repair

PREVENTED
2.1M

tons of pollutants from entering the air we breathe

Emissions testing programs work to reduce air pollution and its negative impacts on human life and the environment

BETTER AIR,
BETTER LIFE.
