**DO NOT PUSH OR FORCE THE LID PAST 90° BEFORE SEAT BASE & SEAT BACK CUSHION ARE INSTALLED ON THE CAR**

- If you are installing a Storage Bucket and decide to release the Storage Lid from the Seat Base before installing the Seat Base and Seat Back Cushion onto the Car, do not try to open the Lid past 90°. Doing so may place too much stress on the Lid Hinge possibly causing failure.
- Once the Seat Base and Seat Back Cushion are installed on the Car, the Seat Back Cushion acts as a stop for the Lid protecting the Lid Hinge from hyper-extension.
- As a precaution, we recommend installing the Storage Lid Latch only after the Seat is fully installed on the Car.
1. Remove Nuts and Washers from the Bolts in the center of the Footrest.
2. Place Hitch Receiver (JJ) over Bolts and reinstall the Washers and Nuts. 
   Fully Tighten Hardware.
3. Attach Hitch (KK) to the Hitch Receiver with provided D-Ring Pins (LL).
