CLUB CAR DS

STEP 1 REMOVE FRONT WHEELS
Place RUN/TOW switch in TOW position. Set brake and chock wheels. Lift cart using jack stands and remove front wheels. Retain hardware.

STEP 2 REMOVE LOWER PLATE
Using a 9/16” socket and wrench remove the four bolts on the lower plate.

STEP 3 INSTALL LIFT BAR
Insert lift bar between leaf spring and top plate as shown.

STEP 4 REPLACE LOWER PLATE
Using supplied hardware, reattach bottom plate and tighten.

STEP 5 REINSTALL FRONT WHEELS
Using hardware retained from Step 1, reinstall front wheels and tighten.
