PREPARE PRODUCT DISPLAY PANELS

REQUIRED FOR BOTH GRID & WALL MOUNT OPTIONS

**SECTION-11**
FENDER FLARES / DELUXE WHEELS

**PREPARING PANEL 11B - DELUXE WHEELS**

**RWD WHEEL HW**

- 1/2"-20 x 3-1/2" Hex Bolt (x4)
- 1/2" Washer (x4)
- 1/2"-20 Nut (x4)
- 1/2"-20 Lug Nut (x4)

**NOTE:** Fully tighten Hardware.

**GRID MOUNT**

RWD SNGL GRID HW

- Fast Lead Captive Screw
- Fast Lead Receiver

**WALL MOUNT**

RWD SNGL WALL HW

- 1/4" Flat Washer (x4)
- #8 E2 Wall Anchor (x4)
- #8 x 2" Screws (wax)
- 1/4" x 1" Black Spacer (x1)

**NOTE:** Fully tighten all 4 bolts using 3/4" wrench & socket.

**GRID MOUNT & WALL MOUNT**

**B** Grid Mount & Wall Mount: When mounting the Steering Wheel Panel make sure to install the extra mounting support before installing the Steering Wheel product.

**C** Position the Wheel onto the protruding bolts. Secure the Wheel with 4 Lug Nuts.

**NOTE:** Fully tighten Hardware.

**D** Align the Wicked Wheel Insert and snap into Wheel. Snap Hub Cap into the Wicked Wheel Insert and install decal.

**NOTE:** Fully tighten Hardware.

**TABLE OF CONTENTS**

Display System Introduction:

- Mounting Options ... pg 2-3
- Sections Layout & Overview ... pg 2-3

Panel & Header Installation:

**Grid Mount Option**

- Prepare Product Display Panels ... pg 12-16
  1) Install Display Panels ... pg 4
  2) Install Display Headers ... pg 5
  3) Install Cushion Samples (Grid) ... pg 5

**Wall Mount Option**

- Prepare Product Display Panels ... pg 12-16
  1) Assemble Installation Jigs ... pg 6
  2) Establish Panel Positions ... pg 7-8
  3) Establish Header Positions ... pg 9
  4) Final Installation ... pg 9
  5) Install Cushion Samples (Wall) ... pg 10-11

Prepare Product Display Panels:

- Section 07
  - Panel 07A - Steering Wheel ... pg 12
  - Panel 07B - Sentry Dash ... pg 13
- Section 08
  - Cushion Samples (No Panels) ... pg 10-11
- Section 10
  - Panel 10A - Track Top & Enclosures ... pg 14
- Section 11
  - Panel 11A - Fender Flares ... pg 15
  - Panel 11B - Deluxe Wheels ... pg 16

**IMPORTANT:** Do not fully tighten hardware until instructed. Read through all instructions before beginning installation.

**DOUBLETAKE RETAIL WALL DISPLAY SYSTEM**

This Retail Display System was developed to meet several objectives:

- To create a complete retail system for designing and selling customized golf cars, and not to be just another device for displaying random individual products
- To provide a sales tool that leads customers through the customization process by presenting a mix of physical product samples and engaging information panels that visually explain available options, colors, etc.
- To look professional, command attention, and promote brand awareness
- To be modular so that you can configure it to best suite your needs
- To easily fit existing commercial display grids already in the marketplace
- The ability to also be installed directly to walls without a commercial display grid
- To be affordable, provide value, and to help you sell more cars with more upgrades

**YOU SELL MORE CUSTOM GOLF CARS.**

**THIS IS MORE THAN JUST ANOTHER RETAIL DISPLAY.**

**THIS IS A COMPLETE SYSTEM DESIGNED TO HELP YOU SELL MORE CUSTOM GOLF CARS.**

1.800.482.4861 / DoubleTakeGolfCar.com
MODULAR DESIGN ALLOWS YOU TO CHOOSE SECTIONS AND CONFIGURE THEM TO WORK BEST FOR YOU.

Our Retail Wall Display System was engineered with a singular focus…to help you sell more custom cars. With a mix of physical product samples and available options, this vibrant, information-filled system will engage your customers and lead them through the customization design process. Now you can give them exactly what they want, and sell it before you commit resources to build it.

DETERMINE WHICH MOUNTING OPTION IS RIGHT FOR YOUR INSTALL

GRID MOUNT OPTION
(See pages 4-5 for installation instructions)

- Grid size required to install a full Display Section: 48" x 96"
- All Display Panels have predrilled mounting holes that align with most standard display wall grids
- Easy and quick installation with Fast-lead Screws and Receivers
- Headers install easily with adhesive-backed velcro

WALL MOUNT OPTION
(See pages 6-11 for installation instructions)

- Wall space required to install a full Display Section: 49-1/4" x 96"
- All Display Panels have predrilled mounting holes. Each Header requires 5/16" mounting holes to be drilled in all four corners
- Wall anchors or wall plugs are required for mounting
- Headers install easily with adhesive-backed velcro

1/4" Nyloc Nut (46)
1/4" x 1/4" Black Spacer (46)

SECTION-11
PREPARING PANEL 011A - FENDER FLARES

POSITION FENDER FLARE ON PANEL

- The Fender Flare product will vary. You will have received one of the four Fender Flares (Front or Rear—Driver or Passenger side). Position your particular Fender Flare to the Panel where it looks best in the available space.

MARK - DRILL 5/16" HOLES - INSTALL

- Hold the Fender Flare secure and mark hole locations. Drill 5/16" holes at all marks.

- Install the Fender Flare using 1/4" x 1" Pan Head Bolts, Black Spacers, Washers and Nyloc Nuts.

NOTE: Fully tighten Hardware.

PREPARING PANEL 011A - FENDER FLARES

- Wall space required to install a full Display Section: 49-1/4" x 96"
- All Display Panels have predrilled mounting holes. Each Header requires 5/16" mounting holes to be drilled in all four corners
- Mounting requires: 1" Black Spacers, EZ Wall Anchors, 4x4x1" Plank Foam Spacers
- Installation Jig (included) is required for consistent panel installation

REQUIRED FOR BOTH GRID & WALL MOUNT OPTIONS

SECTION-10
TRACK TOPS & ENCLOSURES (PANEL 10A)

PREPARING PANEL 10A - TRACK TOPS & ENCLOSURES

ATTACH TOP HANDLE

RWD TOP HANDLE HW

• 1/4” x 2” Pan Head Bolt (x1)
• 1/4” Flat Washer (x2)
• 1/4” Nyloc Nut (x2)
• Top Handle (x1)

[A] Place the Nyloc Nuts into the front track of the Handle. Mount to Panel with 1/4” x 2” Pan Head Bolts and Washers.

NOTE: Fully tighten Hardware.

ATTACH KWICK TRACK ENCLOSURE RAIL

RWD ENC RAIL HW

• 1/4” x 1/4” Black Spacer (x6)
• 1/4” Nyloc Nut (x6)
• 1/4” Flat Washer (x6)
• 1/4” x 1” Pan Head Bolt (x6)

[B] Mount the Kwick Track Enclosure Rail to the panel using 1/4” x 1/4” Pan Head Bolts, Washers and Nyloc Nuts.

[C] Slide Enclosure Samples into the rear track of Enclosure Rail.

[D] Slide Enclosure Cover Flap into the front track of Enclosure Rail.

NOTE: Fully tighten Hardware.

WALL MOUNT INSTALLATION JIGS

• Installation Jig Kit contains parts & hardware for 2 Spacing Jigs
• Designed to make Display Panel alignment and layout easier and more consistent for wall mounted installation
• Installation Jigs provide the minimal required horizontal and vertical spacing between panels and headers, without having to measure

MUST BE PURCHASED IN FULL SECTIONS ONLY • SECTIONS CANNOT BE SPLIT • NO SUBSTITUTIONS

PREPARE ALL PRODUCT DISPLAY PANELS FOR INSTALL (Pages 10-16)
If you have Sections that feature physical product, prepare the panels before beginning installation.
Sections with Product Panels:
- Section 07 - Panel 07A - Steering Wheel...pg 12
- Panel 07B - Sentry Dash...pg 13
- Section 08 - Cushion Samples (No Panels)...pg 10-11
- Section 10 - Panel 10A - Track Tops & Enclosures...pg 14
- Section 11 - Panel 11A - Fender Flares...pg 15
- Panel 11B - Deluxe Wheels...pg 16

1) INSTALL DISPLAY PANELS
- Determine the sequence of the Display Sections and install Display Panels to the wall grid using the diagram to the right as a guide.

2) INSTALL DISPLAY HEADERS
- Next, Install Headers using adhesive-backed velcro.

3) INSTALL CUSHION SAMPLES
- Install Cushion hardware and establish correct spacing

**IMPORTANT**
PRODUCT PANELS THAT REQUIRE EXTRA SUPPORT
The Steering Wheel and Deluxe Wheels Display Panels require extra mounting support. Be sure to attach panels to grid where indicated, before installing product to the panels.

PREPARING PANEL 07B - SENTRY DASH

**IMPORTANT**
PANEL 07A STEERING WHEEL
- REQUIRES EXTRA GRID MOUNT -

PANEL 07B SENTRY DASH
- STEERING WHEEL / SENTRY DASH CAT-20: RWD PANEL GRID HW

- Fast Lead Captive Screw (x4)
- Fast Lead Receiver (x4)
- Hook & Loop Velcro (not pictured)

RWD PANEL GRID HW
- Fender Washer (x2)

**IMPORTANT**
PANEL & HEADER INSTALLATION
- Grid Mount & Wall Mount:
- When mounting the Steering Wheel Panel in the Top Hole.
- Install 1/4” Lock Washer
- Install Flat Washer onto Panel
- Slide along the grid to help with final positioning. Fully tighten screws once panel is in place.

**IMPORTANT**
PANEL 07A STEERING WHEEL
- Grid Mount & Wall Mount:
- Install 1/4” Lock Washer
- Install Flat Washer onto Panel
- Slide along the grid to help with final positioning. Fully tighten screws once panel is in place.

**IMPORTANT**
PANEL B
- Do not fully tighten screws until all 4 have been started. This will allow the receivers to move freely. Fully tighten until the Hub Adapter is secure, then tighten each panel to the grid to achieve a snug fit.

**IMPORTANT**
PANEL A
- Do not fully tighten screws until all 4 have been started. This will allow the receivers to move freely. Fully tighten until the Hub Adapter is secure, then tighten each panel to the grid to achieve a snug fit.

**IMPORTANT**
The Steering Wheel and Deluxe Wheels Display Panels require extra mounting support. Be sure to attach panels to grid where indicated, before installing product to the panels.

**IMPORTANT**

The Steering Wheel and Deluxe Wheels Display Panels require extra mounting support. Be sure to attach panels to grid where indicated, before installing product to the panels.

**IMPORTANT**
PRODUCT PANELS THAT REQUIRE EXTRA SUPPORT
The Steering Wheel and Deluxe Wheels Display Panels require extra mounting support. Be sure to attach panels to grid where indicated, before installing product to the panels.
**PREPARE PRODUCT**

**REQUIRED FOR BOTH GRID & WALL MOUNT OPTIONS**

### PREPARING PANEL 07A - STEERING WHEEL

A) Install Flat Washer into 3” Pan Head Bolt and insert through the back of the Panel in the Top Hole.

B) Install hardware as shown and fully tighten. Set aside Panel and remove hardware for later.

**NOTE:** Fully tighten Hardware.

### GRID MOUNT

- Fast Lead Captive Screw
- Fast Lead Receiver

### WALL MOUNT

- #8 EZ Wall Anchor (x1)
- 1/4” Flat Washer (x2)
- 1/4” x 4” Pan Head Bolt (x2)
- 1/4” x 1-3/4” Pan Head Bolt (x2)

**NOTE:** Fully tighten Hardware.

### INSTALL DISPLAY HEADER

C) Align Header, make sure it is level, then firmly press to attach to adhesive on Velcro.

### SECTION 08 - CUSHION SAMPLES (GRID)

*IMPORTANT*

#### GRID MOUNT PANEL REQUIRES EXTRA SUPPORT - GRID MOUNT & WALL MOUNT

- 1/4” x 1-3/4” Pan Head Bolt (x2)
- 1/4” x 4” Pan Head Bolt (x2)
- 1/4” x 1-3/4” Pan Head Bolt (x2)
- 1” Hook Velcro (Not pictured)

**ATTACH CUSHION INFORMATION FLAP**

- 1” Black Spacers x3
- 4” Pan Head Bolt
- 1/4” x 1-3/4” Pan Head Bolt (x2)

**NOTE:** Fully tighten Hardware.

**GRID POSITION LAYOUT**

- RWD SING WALL HW
- RWD SING GRID HW

**CENTER FLAP**

- 2” Black Spacers
- 1” Black Spacers
- 1/4” Flat Washer
- NYLOC NUTS

**CUSHION SAMPLES**

- GRID POSITION LAYOUT

**ATTACH CUSHION INFORMATION FLAP**

- 1” Hook Velcro
- 1/4” Flange Nut
- 1/4” Flat Washer
- Lock Washer
- 1/4” Lock Washer

**CENTER FLAP**

- 1” Black Spacers
- 1” Flange Nut
- 1/4” Flange Nut
- 1/4” Flat Washer
- Lock Washer

**ATTACH CUSHION INFORMATION FLAP**

- 1” Flange Nut
- 1/4” Flat Washer
- Lock Washer
- 1/4” Lock Washer

**CENTER FLAP**

- 1” Black Spacers
- 1” Flange Nut
- 1/4” Flange Nut
- 1/4” Flat Washer
- Lock Washer

C) Grid Mount & Wall Mount: When mounting the Steering Wheel Panel make sure to install the extra mounting support before installing the Steering Wheel product.

D) Position the Hub Adapter over exposed screw and extra support that was installed above. Next, install the large Fender Washer.

E) Install 1/4” Lock Washer

F) Install 1/4” Flange Nut. Fully tighten until the Hub is secured.

G) Once the Hub Adapter is secure, install the Steering Wheel according to instructions included in the box.

H) Make the Hook & Loop Velcro together. Cut to size and attach pieces to header uprights (x4). Remove backing from Velcro.

I) Cut hook velcro to size and attach 2 pieces to help velcro on Flap.

J) Once the Flap is in place, press to attach cushion back (Press firmly)

K) Flap is removable whenever needed

**NOTE:** If predrilled holes are too tight, drill with a 5/16” drill bit.
PREPARE ALL PRODUCT DISPLAY PANELS FOR INSTALL (Pages 10-16)

If you have Sections that feature physical product, prepare the panels before beginning installation.

Sections with Product Panels:
- Section 07 - Panel 07A - Sentry Dash...pg 12
- Panel 07B - Sentry Dash...pg 13
- Section 08 - Panel 07B - Sentry Dash...pg 13
- Panel 07A - Steering Wheel...pg 12
- Section 10 - Cushion Samples (No Panels)...pg 10-11
- Section 07

Sections with Product Panels:
- Panel 10A - Track Tops & Enclosures...pg 14
- Panel 11B - Deluxe Wheels...pg 16
- Panel 11A - Fender Flares...pg 15

1) ASSEMBLE INSTALLATION JIGS

The Installation Jigs provide the recommended spacing between all Panels and Headers for an easier install.

2) ESTABLISH PANEL POSITIONS

- Measure, level, and establish first BOTTOM panel position (top 2 screws)
- Use installation jigs to establish first TOP panel position (top 2 screws)

(Continued on next page.)

REFERENCE MEASUREMENTS AND DIMENSIONS

ASSEMBLE INSTALLATION JIGS

[A] Place the Jig Plate across the center of the Long Wood piece (1” wide side).
- Use the 2 Short Wood pieces to align the Plate on cross wood piece (Make sure Plate and Wood pieces are straight and square with cross wood piece).
- Attach Plate to cross wood piece using 2 small screws

[B] Align each Short Wood piece with the Plate and secure with wood screws, making sure they remain straight and square with the 1” cross wood piece.

INSTALL HARDWARE

- Install Jig Long Wood (x2)
- Install Jig Plate (x2)
- Install Jig Short Wood (x4)
- Small Screws

INSTALL CUSHION SAMPLES

5

ATTACH CUSHION INFORMATION FLAP

Center Flap to one side of cushions

Remove backing from velcro and adhere Flap to cushion back (Press firmly)

Install EZ Wall Anchor side wall and mark location.

Measure up 41” from the floor and at least 2” from any side wall

NOTE: Fully tighten Hardware.

Flap is removable whenever needed

W] Mount the Cushion Hanger Wood using provided hardware and 1/2” Black Spacer between wood and wall.

[1] Use installation jigs to establish first TOP panel position (top 2 screws)

[4] Use installation jigs to establish first TOP panel position (top 2 screws)

[6] Use installation jigs to establish first TOP panel position (top 2 screws)

[9] Use installation jigs to establish first TOP panel position (top 2 screws)

RWD PANEL GRID HW

- Install Jig Long Wood (x2)
- Install Jig Plate (x2)
- Install Jig Short Wood (x4)
- Small Screws

RWD PANEL GRIP Forgot US

- Install Jig Long Wood (x2)
- Install Jig Plate (x2)
- Install Jig Short Wood (x4)
- Small Screws

CUSHION HANGER WOOD SUPPORTS

- 1/4” Flat Washer (x2)
- #8 EZ Wall Anchor (x2)
- #8 x 2” Screw (x2)
- 1/4” x 1/2” Black Spacer (x2)
- Cushion Hanger Wood (x1)

INSTALLATION JIGS Provide automatic spacing for an easy install

[5] Install Wall Anchors at marked locations.

**IMPORTANT** Use a Screw and Washer to TEMPORARILY attach the Panel on remaining top corner (Only the two top holes should be installed)

**DO NOT FULLY TIGHTEN**

NOTE: Fully tighten Hardware.

Hang Cushions on Wood Hangers.
**WALL MOUNT**

**CUSHION SAMPLE INSTALLATION**

**5) INSTALL CUSHION SAMPLES**
- Install Cushion Sample hardware
- Establish correct spacing and install Cushion Hangers

---

**REFERENCE MEASUREMENTS AND DIMENSIONS**

**INSTALL THE CUSHION HANGER WOOD SUPPORTS**

**INSTALL HARDWARE**

- 1/4” Flat Washer (x4)
- #8 EZ Wall Anchor (x4)
- #8 x 2” Screws (x4)
- 4 x 4” x 1” Plank Foam (x2)
- 1/4” x 1-3/4” Pan Head Bolt (x2)
- 1/4” Fender Washer (x2)
- 1/4” x 3/4” Black Spacer (x2)

**F** Use a Screw and Washer to TEMPORARILY attach the Panel. **DO NOT FULLY TIGHTEN**
- Leave the panel about 1/2” from the wall, so that it can easily support a level and the Installation Jigs.
- (Do this for all panels during the layout phase. 1” spacers will be added during final installation)

**G** Remove the Top Panel and set aside. Install all 4 EZ Wall Anchors at marked locations.

**H** IMPORTANT** **
- Make sure to mark extra holes and install extra Wall Anchors for Product Panel O7A/Steering Wheel (pg 12) & Panel 11B-Deluxe Wheels (pg 16)

---

**ESTABLISH PANEL POSITIONS**

**ESTABLISH FIRST TOP PANEL POSITION USING INSTALLATION JIGS**

**U** See the layout reference above for proper spacing. Position the Cushion Hanger Wood, make sure it’s level, and mark hole locations.

**V** Install Wall Anchors where marked.

**C** Measure up 41" from the floor and at least 2" from any side wall and mark location. Install EZ Wall Anchor

**D** Use a Screw and Washer to **TEMPORARILY** attach the Panel. **DO NOT FULLY TIGHTEN**
- Leave the panel about 1/2” from the wall, so that it can easily support a level and the Installation Jigs.
- (Do this for all panels during the layout phase. 1” spacers will be added during final installation)

**E** Level the Panel and mark the opposite top hole. Lower Panel and install EZ Wall Anchor.

Continued on next page
2) ESTABLISH PANEL POSITIONS (continued)

- Use installation jig to establish positions for remaining panels (top 2 screws).

3) ESTABLISH HEADER POSITIONS

- Remove cross bar from Installation Jig.
- Drill 5/16" holes in Header corners (x4).
- Measure to mark Header starting point and then use jig cross bar as spacer to position first Header (top 2 screws).
- Continue to establish positions for remaining Headers.

**DO NOT FULLY TIGHTEN**

4) FINAL INSTALLATION

- Mark all remaining hole positions in Panels & Headers
- Remove all Panels & Headers / Install wall anchors at all marked locations.
- Apply Foam Blocks to backs of Panels & Headers / Re-install all Panels using 1” black spacers.

5) INSTALL CUSHION SAMPLES

- Establish correct spacing and install Cushion Hangers (See next page).

**2-PERSON JOB**

6) **2-PERSON JOB**

- Using the Install Jig on the right edge, position the next Bottom Panel, make sure it’s level, and then mark all 4 mounting locations.

**DO NOT FULLY TIGHTEN**

7) **2-PERSON JOB**

- Place the Top Panel onto the Install Jigs. Make sure the Jigs are snug and mark all 4 mounting holes for Top Panel.

- NOTE: If you’re installing the Steering Wheel Panel (TOTAL) or the Deluxe Wheel Panel (11B), make sure to mark the EXTRA HOLE location before installing. See (J) above.
- Remove Panel and install Wall Anchors.
- Replace Panel and install top two screws.
- Continue with this process until all top and bottom Panels have been temporarily installed.

**DO NOT FULLY TIGHTEN**

8) **2-PERSON JOB**

- Position Header and mark Wall Anchor locations. Make sure to use the 1” wood spacers and butt the edges of the headers together (P).
- Continue until all Headers have been positioned.

**FULLY TIGHTEN HARDWARE**

9) Reinstall all Panels & Headers using the 1” Black Spacers.

Panel and Header installation is now complete. If you have Section 08 - Cushion Samples, proceed to instructions on the next page...
