The future of running
Connecting with the next generation of racially diverse runners

Funded by NEW RESEARCH FROM THE RUNNING INDUSTRY DIVERSITY COALITION
Growing up as a Black kid in my Philadelphia neighborhood, I never saw runners. You ran because you were in danger or because you thought you were in danger. There were no school programs or resources for sports, our teachers didn’t take gym class seriously, and my parents and grandparents didn’t have time to think about running for fun or for health while fighting for our basic needs.

It wasn’t until college that I started learning about—and experiencing—the benefits of running. Since then I’ve run every distance up to and including the 26.2-mile marathon. Running gave me the freedom to rise above some of the challenges from my upbringing and exposed me to endless opportunities for my health and career goals. Fast-forward to today; I have made a career in the running industry as the Executive Director of the Running Industry Diversity Coalition (RIDC), and I am the cofounder of a local running club started over a decade ago.

Despite my individual success, there are systems in place that prevent Black people and other people of color from participating in and advancing in the business of running. This includes systemic racism, implicit bias, discriminatory practices, and arbitrary barriers. The RIDC aims to change this, and it is with great pride that we announce new research that centers on the experiences of people of color across the entire running industry. In collaboration with Bentley University, these studies establish a baseline for measuring collective progress.

The report you’re reading is one of three in a series. It provides particular insights about the status quo of the running industry today, as well as key questions and recommendations to make transformative change towards racial justice.

More than anything, these research studies are a call to action.

We need leaders and community members—of all identities, geographies, and positions of power—to not only speak up about the importance of achieving racial justice but to also use RIDC’s research findings to make the running industry more accessible, inclusive, and safe for all runners. We need you to share what accountability looks like for you and your company to do this. We need you to ask critical questions about your current systems, engage in new learnings with your colleagues, and, most importantly, collaborate with the RIDC to build a running industry and culture that leaves no one behind.

We all deserve the #FreedomToRun, and it’s our shared responsibility to fight for it.

Thank you to our research funders and partners—Altra, Brooks, New Balance, On, Patagonia, Salomon, Saucony, Smartwool, and Strava—for helping to make this work possible. Thank you to our research team and study participants, board members, and staff for helping the RIDC launch necessary research that will positively impact generations to come. And thank you, reader, for being on the path to progress with us.

In partnership,
Kiera Smalls
Executive Director, Running Industry Diversity Coalition

“We’ve got to be as clear-headed about human beings as possible, because we are still each other’s only hope.” —James Baldwin, in A Rap on Race
We know that achieving racial justice is a marathon, not a sprint, and we know that to affect real change we have to fully understand our starting line. As part of our five-year strategic plan, we partnered with Bentley University to produce quantitative and qualitative baseline measures for racial diversity, equity, and inclusion (DEI) as it relates to running industry employment, accessibility, inclusion, and belonging. We are looking for progress, not perfection. Let’s get into the data!

See other RIDC studies titled “Racial Diversity in Trail Running: Understanding the Underrepresented Experience” and “Racial Diversity And The Business of Running: Mapping a Path to Equitable Employment, Leadership, and Ownership”.

OVER THE PAST THREE YEARS, THE RUNNING INDUSTRY DIVERSITY COALITION HAS DRIVEN AWARENESS, CONVERSATIONS, AND ACTION IN THE RUNNING INDUSTRY REGARDING ISSUES OF RACIAL DIVERSITY, EQUITY AND INCLUSION.
**IMPORTANT TERMS AND DEFINITIONS USED IN THIS STUDY**

**Racial Justice**
A vision and transformation of society to eliminate racial hierarchies and advance collective liberation, where Black, Indigenous, Latinx, Asian Americans, Native Hawaiians, and Pacific Islanders, in particular, have the dignity, resources, power, and self-determination to fully thrive.

**BIPOC**
When you see ‘BIPOC’ throughout RIDC materials, we are talking about Black, Indigenous, and people of color. We also use “people of color” as well.

**TERMS USED TO DESCRIBE INFORMATION SOURCES:**

**SFIA**
Stands for the Sports and Fitness Industry Association, a trade organization in the sporting goods and fitness industry. They work in partnership with Sports Marketing Surveys USA to supply premier sports and fitness industry research.

**MRI Simmons**
MRI Simmons is a joint venture between the two largest consumer survey companies in the US, MRI and Simmons Research. They are a premier provider of information on consumer behavior.

**Global Runner Survey**
An annual study, published by Running USA, designed to assess the demographics, lifestyle, perspectives, habits and preferences of the running population nationwide.

**NCAA**
Stands for the National Collegiate Athletic Association. It is the governing body for intercollegiate athletics. Its membership is comprised of approximately 1,000 colleges and universities in the United States, operating 102 athletics conferences across three divisions (Division I, II and III).

---

1(Race Forward, n.d.)
BEFORE YOU DIVE IN

● How aware are you of your own implicit biases?

● What is your understanding of racial identity and privilege, and the impact these have on the decisions you make?

● Where are you in your journey of understanding the role that racial equity plays in the current and future vitality of the running industry?
RIDC EMPLOYMENT AND PARTICIPATION STUDY OBJECTIVES

PHASE 1: PARTICIPATION

Source statistics to outline the current racial and ethnic composition of running participation in the US.

Analyze and compare the diversity of the US population to the current state of diversity within running participation.

PHASE 2: EMPLOYMENT

Source statistics to outline the current racial and ethnic composition of running industry employment, leadership, and ownership.

Analyze and compare the diversity of the US population to the current state of diversity within running participation and to the current state of diversity within running industry employment, leadership, and ownership.

Utilize statistics to:
- Measure and track progress with regard to racial and ethnic representation in running industry employment, leadership, and ownership
- Measure and track racial and ethnic representation in running participation
- Assist organizations in the running industry to create goals, build action plans, and measure progress over time

See the RIDC research report: Racial Diversity and the Business of Running: Mapping a Path to Equitable Employment, Leadership, Ownership.
THE FUTURE OF RUNNING: BIPOC RUNNERS ARE...

34% of runners age 11+¹

40% of runners between age 18-24¹

51% of Americans (by 2045)²

¹(SFIA, 2021) ²(Frey, 2018)
THE FUTURE OF RUNNING IS RACIALLY DIVERSE. WE NEED TO CREATE SPACE FOR ALL OF US.

A SPACE WHERE EVERYONE IS WELCOME, INCLUDED, AND WILL THRIVE.
The following study assesses the current state of racial diversity in the running industry using data sources widely used by industry organizations.

The Running Industry Diversity Coalition’s goal is for these data sets to be compared, tracked, and reviewed together to provide a broader view of racial diversity and the participation of BIPOC runners within the sport.

IMPORTANT NOTE:
We recognize that the secondary data sourced for this study does not specifically capture Native American/Indigenous groups. We also recognize that the U.S. Census doesn’t specifically use Native American/Indigenous terms.

The U.S. Census defines American Indian or Alaska Native as “A person having origins in any of the original peoples of North and South America (including Central America) and who maintains tribal affiliation or community attachment”.

We’ve received feedback that this is not enough, this is erasure and unacceptable. Considering these limitations in the U.S. Census tool, we are committed to representing Native American/Indigenous groups in our own primary research reporting.
DEMOGRAPHIC TRENDS
US DEMOGRAPHICS ARE CHANGING

- 65% or higher
- 55% - 64.9%
- 45% - 54.9%
- 35% - 44.9%
- Less than 35%

2020 United States Diversity Index

*Diversity Index: the probability that two people chosen at random will be different races*
EVERY STATE IN THE COUNTRY IS BECOMING MORE RACIALLY DIVERSE

10 Year Historical Change (2010 - 2020) in United States Diversity Index

Diversity Index: the probability that two people chosen at random will be different races
BY 2045, THE US WILL BE MAJORITY BIPOC

*Non-Hispanic members of the racial identity category

(Frey, 2018)
DEMOGRAPHIC CHANGE WILL CONTINUE TO GROW

Driven by growth in BIPOC identity groups and a decrease in the white population.

2018–2060 Projected Change

Multiracial: +176%
Asian: +93%
Hispanic: +86%
Black: +34%
GROWTH WILL BE DRIVEN BY BIPOC YOUTH

US Racial/Ethnic Profiles, 2018 and 2060

*Non-Hispanic members of the racial identity category

(Frey, 2018)
The representation of Hispanic runners as a percent of total runners in each of the youngest two age brackets outpaces the overall representation of Hispanic runners as a percent of total overall runners; and the older the runner, the more likely they are to be white.

(SFIA, 2021)
CURRENT DATA SOURCES SHOW HUGE DIFFERENCES IN RACIAL/ETHNIC BREAKDOWN OF RUNNING PARTICIPATION

Data captured at races, in stores, events and running clubs shows a FAR less racially diverse population of runners

GLOBAL RUNNER SURVEY

SFIA

Note: please see the methodology for each information source on the next slide.

1(Running USA, 2021), 2(SFIA, 2021)
DATA SOURCE METHODOLOGY

The methodologies for the two data sources on the previous page are detailed below.

Global Runner Survey Methodology

Initially launched in 2007, the Survey is distributed electronically on an annual basis to race directors, media, running retailers, brands and vendors, running clubs and others who have an interest or do business within the running industry. Beginning with the 2020 Global Runner Survey, the results will be named for the year the survey was conducted. The research for the results contained herein was conducted among North American respondents from November to December 2020.

Field Dates: November–December 2020

4,500+ runners responded

Sample: Reflective of convenience random sample. Results reflective of core runners: Active adult participants who tend to enter running events and train year-round.

SFIA Methodology

All participation statistics are from a nationwide study conducted during the 2020 calendar year by Sports Marketing Surveys USA (SMS). Under the guidance of the Sports and Fitness Industry Association (SFIA) and seven other sports industry associations that make up the Physical Activity Council (PAC), the participation study was designed and launched by Digital Research (DRI). All other data is attributable to the SFIA/SMS research partnership.

During 2020, a total of 18,000 online interviews were carried out with a nationwide sample of individuals from U.S. proprietary online panels representative of the U.S. population for people ages six and older. Strict quotas associated with gender, age, income, region, and ethnicity were followed to ensure a balanced sample.

The 2020 participation survey sample size of 18,000 completed interviews provides a high degree of statistical accuracy. All surveys are subject to some level of standard error - that is, the degree to which the results might differ from those obtained by a complete census of every person in the U.S. A sport with a participation rate of five percent has a confidence interval of plus or minus 0.32 percentage points at the 95 percent confidence level.

A weighting technique was used to balance the data to reflect the total U.S. population ages six and above. The following variables were used: gender, age, income, ethnicity, household size, region, and population density. The total population figure used was 303,971,652 people age six and older.

Note: methodology is reported here as it was reported by the information source.
46,417,000

total U.S. running/
jogging participants*

*Ages 11+; variation in totals exists due to rounding.

Total Caucasian/White, non-Hispanic runners are 66.3% or 30,757,000

TOTAL BIPOC U.S. RUNNING / JOGGING PARTICIPANTS

<table>

Total ≈ 34% 16M

(SFIA, 2021)
The average runner spends $1,795 per year on running gear and races.

- $299 on running shoes
- $199 on running apparel
- $119 on running technology
- $435 on race registration fees
- $604 on travel for races
- $139 on medical needs

What does the average runner expenditure mean for the buying power of runners of color? (hint: it’s significant)
The percentage of BIPOC runners peaks at age 18-24.
The following two slides analyze running participation by racial/ethnic identity group, by U.S. region.

The first of the two slides highlights areas where running participation is under-indexed for specific racial/ethnic identity groups in specific regions.

The second of the two slides highlights areas where running participation is over-indexed for specific racial/ethnic identity groups in specific regions.

The indices below were created to aid the analysis. Using an index to measure changes in data allows you to calculate the percentage change between the points in the index without the need to know the actual data numbers.

**ETHNICITY INDEX**
(Ethnicity % of Total in Region / Ethnicity % of Total Overall) * 100

**AGE COHORT INDEX**
(Age Cohort % of Total in Region / Age Cohort % of Total Overall) * 100
GEOGRAPHIC OPPORTUNITIES TO INCREASE BIPOC running participation

How to read the ethnicity index and age cohort index below:
Cells with numbers below 100 indicate that running participation for that particular racial/ethnic identity group or age group is under-indexed compared to total U.S. running participation for that racial/ethnic identity group or age group.

This data represents pathways to increase running participation across the country.
**Geographic Opportunities to Include BIPOC Individuals Who Are Already Running/Jogging**

How to read the ethnicity index and age cohort index below:

Cells with numbers above 100 indicate that running participation for that particular racial/ethnic identity group or age group is over-indexed compared to total U.S. running participation for that racial/ethnic identity group or age group.

This data represents key opportunities to be more inclusive to individuals who are already running and jogging.
WHAT YOU CAN DO

Now that you’ve read all that data... what’s next? We have some things for you to consider.

- If your organization is sourcing data about running participation (or a related topic), make sure you understand the methodology the study uses to see if it accurately captures the racial identities of those who are out running and jogging.

- Reflect on what your organization can do to create space for the nearly 16 million BIPOC runners and joggers who are currently out running.

- Center, listen to, and learn from voices that have been historically left out of conversations in the running industry. This is not only a critical step for inclusivity, it helps the running industry stay relevant as the US population becomes more racially diverse.
The cycle of inaction

This cycle has been repeated throughout history in response to horrific injustice. The running industry can – and must – break the cycle.

The running industry is at risk of falling into the back half of the cycle. With intentional action, we can avoid that.
## Discussion Questions for Your Teams

<table>
<thead>
<tr>
<th>Question</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>How are you preparing for the changing demographic landscape in the U.S.? What programs or opportunities can we create to support BIPOC youth runners?</td>
<td>How would the running industry positively change if racial and ethnic representation in running participation mirrored BIPOC representation in the U.S.? How can we continue to grow awareness of the various spaces and privileges from which BIPOC have been historically excluded?</td>
</tr>
<tr>
<td>How can we better engage regions across the U.S. where people of color have thus far been underserved by the running industry?</td>
<td>How can you incorporate cultural context into decision making as you envision expanding the running community that you serve? How do we keep BIPOC youth engaged as they age and shift how they spend their time?</td>
</tr>
</tbody>
</table>
Between ages 35-44, runners switch from casual to core

**Casual** = Run/jog <50 times a year  
**Core** = Run/jog >50 times a year

### Casual vs. Core by Age Cohort

Running/Jog Participation
Casual (<50 annually) vs. Core (+50 annually)
ACKNOWLEDGEMENTS

The RIDC, a 501(c)(3) nonprofit, would like to express our gratitude to everyone who made this research possible. Your investments in this project have advanced our knowledge and understanding of the impacts on the running communities we serve. This research is the beginning of envisioning something better – a more inclusive and racially diverse running industry.

Thank you to New Balance for their leadership, and for providing the generous funding that helped us to see what’s possible.

We are extremely grateful to each and every participant in this study. Your willingness to share your experiences and insights, be vulnerable, and meaningfully engage with us is a significant contribution to not only the RIDC but is deeply impactful for the running industry. The RIDC would also like to recognize the dedication, expertise, and work of the research team:

- **Erin Flynn**: Professor, Bentley University
- **Shelle Santana**: Professor, Bentley University
- **Fikayo Babatunde**: Consultant, RIDC
- **Jenna Klein Jonsson**: Partner, Blaze Partners

In addition, we would also like to acknowledge the following who help the RIDC make continuous progress:

- **Staff**: Abigail Sharpless, Betsy Rathwell, Kiera Smalls, and a host of volunteers and consultants.

- **Multi-year Corporate Donors**: Altra, Brooks, Charm City Running, Feetures, Fleet Feet, GU, HOKA, Mill City Running, Mizuno, New Balance, New York Road Runners, Patagonia, Pacers Running, Playmakers, REI, Salomon, Saucony, Smartwool, Superfeet, and Tracksmith.
