

Fall protection VisionNeo

Fall protection with optimal view out

SOLAR-SHIELD
exterior shading solutions

Integrated fall protection
VisioNeo

Secure floor-to-ceiling windows in style

Integrated fall protection VisioNeo is the modern 2-in-1 sun shading solution for your floor-to-ceiling windows on upper floors. That means: fall protection and sun shading systems in one integrated system. Instead of a solid railing, a window pane is integrated as a slender balustrade and creates perfect transparency.

You can get VisioNeo with our external sun shading systems such as window awnings, external venetian blinds and roller shutters and as VisioNeo Single without a sun shading system.

The special design feature: the sun shading system descends to floor level in front of the fall-protecting window pane – a visually and architecturally perfect solution.

The high-grade aluminium components are also discreet and nearly invisible. They are available in all variants of the WAREMA Colour World. Enjoy maximum safety with harmonious, transparent elegance.

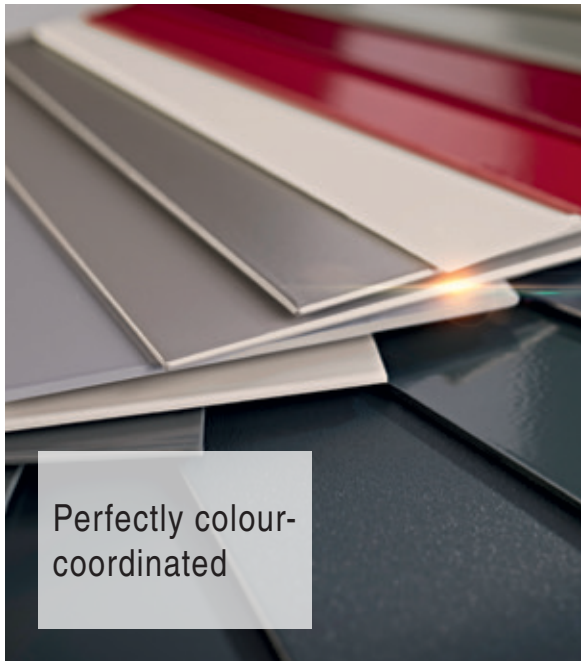

You can find more information at

Benefits of integrated fall protection VisioNeo

Modern design

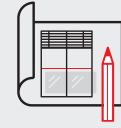

- / Unobstructed, clear view
- / Harmonious combination with permanent glazing
- / High-grade workmanship: concealed screw connections & very fine glass edge protection
- / Recipient of the iF Design Award 2018
- / Huge colour selection (individual powder coating)

Applications

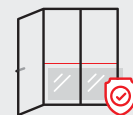

- / Can be freely combined with permanent glazing thanks to innovative middle rails
- / New buildings & renovations equally suitable for installation
- / Insect screens and pollen protection can be integrated, now or later
- / Can be combined with Warema roller shutters, external venetian blinds and window awnings. Also available as VisioNeo Single without sun shading system
- / The sun shading system moves floor-to-ceiling in front of the window pane without restriction

Planning

- / Fall protection & sun shading system can be planned as one
- / System statistics
- / Glass edge protection already included in the WAREMA scope of delivery
- / Construction limit values:
max. width: 2,500 mm
max. glass height: 1,200 mm

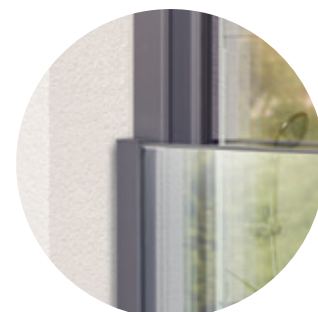

Safety

- / Certified according to the valid standard
- / Perfect glass edge protection
- / Indispensable for the safety of both the young and old

VisioNeo Single – without sun shading

Fall protection with view out, also individual

VisioNeo Single details

Windows on north-facing facades without sun shading systems do not have to do without the stylish VisioNeo fall protection. We also offer the solution of the single variant.

The result: fall protection VisioNeo Single can be harmoniously integrated into your facade, adding to the style. You get light, brightness and safety as well as an unrestricted view out.

VisioNeo Single – without sun shading

VisioNeo
Single

Feel completely comfortable every day.

Insect and pollen protection

Insect screen
combined with VisioNeo

Enjoy the whole summer in peace

The best part of WAREMA solutions is that everything is ideally coordinated, all the elements complementing each other perfectly. The best example: VisioNeo in combination with insect screen/pollen protection.

The WAREMA insect screen, e.g. as a fixed frame or roller blind, closes seamlessly along all edge areas so that no irritating pests can enter from the outside. You'll enjoy constant fresh and clean air.

But our insect screens can also offer a lot more: the innovative WAREMA VisionAir pollen protection and fine dust gauze effectively filter the finest airborne particles from the breathable air and make being at home an unimpaired pleasure for allergy sufferers.

Three steps to your integrated fall protection VisionNeo
