

## Baltic Code Zero Race

Baltic Code Zero laminates are ultra-high value performance laminates for code zero racing applications. The Baltic range was designed with light weight taffetas, high tenacity aramid and polyester fibers, and superior films for high performance. Five styles are available, which use an efficient 22° fiber with black polyester or black Twaron in the warp.

Baltic Code Zero Race is for large racing boats that need highest quality and performance and OD classes where only polyester fiber is permitted. It is a Challenge laminated product. Baltic combines the strength and power of several materials into one premium product. It contains precision laminated light weight taffeta film with polyester or aramid warp inserts. For added bias strength we included Twaron black stability. Baltic is treated with Ultrafresh anti-mildew.

Baltic CZ Race contains a full range of weights beginning at 1.5 oz / 64g, up to 2.5 oz / 111g. The warp Black Twaron extends to 6000 dpi for most heavyweight sailing needs.

Fabric ID	Skin	X Insert	Warp Insert	Film	Taffata	Weight
Baltic 6	50 x 50	1000d Black Polyester 22°	6 EPI Black Polyester 1000d	0.5	Grey 432c	129 gsm
Baltic 4 Aramid	50 x 50	1000d Black Aramid 22°	4 EPI Black Aramid 1000d	0.5	Grey 432c	110 gsm
Baltic 6 Aramid	50 x 50	1000d Black Aramid 22°	6 EPI Black Aramid 1000d	0.5	Grey 432c	118 gsm
Baltic 8 Aramid	50 x 50	1000d Black Aramid 22°	8 EPI Black Aramid 1000d	0.5	Grey 432c	128 gsm
