

XRP Race Laminates

These durable and high value sailcloth styles are a great choice for classes that restrict the use of exotic fibers. XRP styles were designed with high strength to weight ratios. They use efficient fiber inlays without square scrims for reduced weight and increased load angle weight bearing.

XRP uses High Tenacity black coated fibers that have good UV, stretch, and tear resistance. Constructions are black high tenacity polyester warp, strong fill-X inserts, precision laminated.

XRP are perfect for racing and club racing headsails and mainsails, multihull screechers, and reinforcements, and large yacht code zeros.

Fabric ID	Warp	Fill-X 60°	Film	Weight	Width
XRP6	6000	3000	1.50	3.04 oz. 130 gsm	60" 1.5 m
XRP9	9000	3000	1.50	3.74 oz. 160 gsm	60" 1.5 m
XRP13	13000	3000	1.50	4.44 oz. 190 gsm	60" 1.5 m
XRP18	18000	3000	1.50	5.14 oz. 220 gsm	60" 1.5 m
XRP24	24000	3000	2.00	6.14 oz. 263 gsm	60" 1.5 m
