PROTECTION GUIDE — BODY ARMOUR

Syringe Protection

There is no Home Office standard for syringe protection, but all Fortis body armour provides a high level of resistance to syringes

Spike Protection

Fortis body armour is certified to the Home Office spike resistance (SP) standards. Many suppliers offer knife resistance (KR) but no spike resistance. Spikes are a separate and serious threat, with a separate Home Office standard.

Spike protection relates to spiked weapons, such as screwdrivers, chisels and other improvised weapons

Knife Resistance Body Armour Standards

Fortis armour is tested and certificated to either KR1 or KR2.

Knife Resistance relates to edged weapons, such as knives and axes

KR1—(Knife Resistance Level 1) & **SP1** (Spike Resistance Level 1) are the levels of stab and spike protection recommended by the Home Office for general police duties. The vast majority of police in the UK wear KR1 level vests. The vast majority of police in the UK wear KR1 level vests. KR1 (when combined with SP1 and syringe/needle protection) will provide adequate protection in the vast majority of situations.

KR2—(Knife Resistance Level 2) & **SP2** (Spike Resistance Level 2) are the levels of stab and spike protection recommended by the Home Office for more dangerous police duties, such as armed patrol in higher risk scenarios, eg. patrolling at airports or escorting prisoners.

Ballistic (Bullet) Body Armour Standards

The levels of protection cover the following threat groupings:

HG1 - Low Handgun

Protection against standard ammunition fired from short-barrelled handguns.

This is the level of protection recommended by the Home Office for general police duties where handguns may be encountered

HG2 - High Handgun/ Carbine

Protection against standard ammunition fired from long barrelled handguns, 9mm carbines and sub machine guns.

This is the level of protection recommended by the Home Office for higher risk scenarios for tactical firearms teams, special forces operations and situations where sub machine guns may be encountered

RF1 – Rifle

Protection against soft-core ammunition fired from rifles.

SG1 – Shotgun

Protection against BB and No.6 shot fired from full-length shotguns at close range

Full technical specs available on the Fortis website www.fortisarmour.com

INFORMATION — BODY ARMOUR

Insurance

Fortis® Armour carries Public and Product Liability insurance held by TW Kempton (Corporate Clothing) Ltd of £10,000,000 for each and every occurrence.
