Sunset Goat Yoga at Hunter Farm

WHAT IS GOAT YOGA

It's a yoga class led by a local yoga instructor who leads you through various poses alongside baby goats. It's a great way to amplify the health benefits of yoga by introducing a mix of pet therapy, all while enjoying the outdoors on a picturesque historic farm. Goat yoga can promote respect for all animals, allows people to connect with nature, and invokes a sense of living in the moment.

Hunter Farm

WEDDINGTON NC · EST 1868

The Hunter Farm has been in the same family since 1868. Farmer Nancy's great grandmother was raised here, and the farm has been passed down on her mother's side since. While the operations of the farm have certainly changed over the years - from cash crops to dairy cattle to small scale agritourism - it has always existed as a place its community could call home. Today the Hunter Farm serves as a small scale agritourism business, offering a space for the community to reconnect with the land and its animals, and experience a seasonal, working farm.
