2019 North American Artery
9th Annual Meeting

Chronological vs. Vascular Aging:
Biological, Clinical and Population Implications

co-sponsored by
The University of Iowa

The University of Iowa, Iowa City, Iowa, USA
May 17-18, 2019

Follow us on Twitter @NAASociety and on the web: www.naartery.org
NIHem USB

The ultimate noninvasive hemodynamic workstation for tonometry, blood pressure and comprehensive pressure-flow data acquisition and analysis

- Automatic or auscultatory blood pressure with playback and overread capability
- Carotid-femoral pulse wave velocity – the gold standard measure of aortic stiffness
- Doppler input and spectral analysis with signal averaging and automatic flow waveform extraction
- Central pressure-flow analysis
  - Characteristic impedance
  - Waveform separation from measured pressure and flow
  - True forward and backward wave amplitudes and global reflection coefficient
- Batch mode analysis facilitates high-throughput work flow
- For research only

NIHem WF

A compact solution for tonometry data acquisition and analysis

- WiFi link to laptop or tablet computer
- WPA2-PSK (AES) security
- Supports tonometry and ECG acquisition
- Carotid-femoral pulse wave velocity
- Central pressure waveform analysis
- For research only

MEETING VENUE
The University of Iowa (UI)
All sessions and food functions will take place in the Main Lounge Ballroom of the Iowa Memorial Union (IMU) located on the East side of the UI Campus.

MEETING REGISTRATION
Registration includes attendance to all sessions, poster presentations, exhibit areas, and all food functions, except the Friday night dinner. Registrants will receive a Program Syllabus and a supplemental program packet that includes all accepted abstracts and PDF copies of available presentations.

Early Registration Fees (before May 10) are:
- Members: $180.00
- Non-Members: $280.00
- Trainees/Students (validation may be required): $115.00

Onsite Registration Fees (after May 10):
- Members: $200.00
- Non-Members: $300.00
- Trainees/Students (validation may be required): $115.00

All conference materials including badges can be picked up from the registration desk during the following hours:
- May 17, 2019: 7:30 AM – 6:00 PM
- May 18, 2019: 7:00 AM – 2:00 PM

Badges are required for entry to all functions.

CONFERENCE SESSIONS
IMU Main Lounge
All sessions will take place in the Main Lounge Ballroom, on the first floor of the Iowa Memorial Union on the East side of the UI Campus.

POSTERS ON DISPLAY
IMU Main Lounge
Posters will be on display throughout the conference. Presenters will be available to discuss their posters during lunch on Saturday.

PRACTICAL HANDS-ON PRODUCT DEMONSTRATIONS
Exhibiting sponsors will provide practical hands-on demonstrations of their devices during the breaks on Friday, May 17 and Saturday, May 18.

Friday, May 17
3:20 – 3:30  Cardiovascular Engineering
3:30 – 3:40  Fukuda Denshi USA
3:40 – 3:50  ALF Distribution GmbH
5:30 – 5:40  Uscom Limited

Saturday, May 18
10:55 – 11:05  Softcare/Laser Speckle Flowography
11:05 – 11:15  UNEX
11:15 – 11:25  Hitachi
1:45 – 1:55  MitoQ

EXHIBITS, REFRESHMENTS & LUNCH
IMU Main Lounge
All meal functions and refreshment breaks, except dinner, will take place in the Main Lounge, as shown below.

Friday, May 17, 2019
Refreshment Break AM  11:10-11:45 AM
Lunch  12:45 - 1:35 PM
Refreshment Break Early PM  3:00 - 3:55 PM
Refreshment Break Late PM  5:25 - 5:45 PM

Saturday, May 18, 2019
AM Refreshment Break  10:30-11:30 AM
Lunch/Poster Presentations  12:55-2:00 PM

PARTICIPANTS’ RECEPTION
Friday, May 17, 2019
NAA’s Participant Reception, co-hosted by the University of Iowa, will take place from 6:30-7:15 PM in the IMU Terrace overlooking the Iowa River. All participants are invited to attend.
GENERAL INFORMATION

NETWORKING DINNER
*Kinnick Stadium, McCord Club Lounge, First Floor*

NAA's Networking Dinner will take place from 7:30 to 9:00 PM at the Kinnick Stadium Press-box. Transportation will be provided. There is an additional $25.00 fee for members and non-members who wish to attend the dinner on Friday evening. Your name badge will indicate your paid attendance at the dinner.

This is an excellent opportunity to network with leading experts in the field while enjoying the reception and a full, multi-course dinner served with beer, wine, and soft drinks.

HEADQUARTERS HOTEL
*The Iowa House Hotel*

125 North Madison Street
Iowa City, IA 52245
Telephone: +1-319-335-3513

The hotel is located inside the Iowa Memorial Union, where the conference is located.

Overnight Parking
Parking is included for those staying at the Iowa House Hotel.

CONFLICT OF INTEREST DISCLOSURE

North American Artery strives to ensure balance, independence, objectivity, and scientific rigor in its educational activities. Faculty members have disclosed financial relationships, in existence over the past 12 months, with commercial interests or with manufacturers with products associated with or discussed in their presentation. All Disclosure Statements are available to meeting attendees in a separate handout.

NINTH ANNUAL MEETING SPONSORS

North American Artery thanks the following Sponsors for their generous support of the meeting.

We encourage all participants to visit with our sponsors’ exhibit booths during the breaks.

CONFERENCE CO-SPONSOR
The University of Iowa

PLATINUM BREAKFAST SPONSORS
Cardiovascular Engineering, Inc.
AtCor

GOLD SPONSORS
Mobil-O-Graph/ALF
MitoQ
Fukuda USA
Hitachi Healthcare
The American Physiological Society
UNEX Corporation
Softcare Co., Ltd.
Uscom Inc.

BRONZE SPONSOR
Medical Imaging Applications

OTHER SUPPORT
Medtronic, Inc.

We would like to acknowledge the University of Iowa Department of Health and Human Physiology for their generous support.
Dear Colleagues,

It is with great pleasure that I invite you to participate in the Ninth Annual Meeting of North American Artery that will take place on May 17-18, 2019 at the University of Iowa, Iowa City, IA. The theme for the 2019 conference is ‘CHRONOLOGICAL VS. VASCULAR AGING: BIOLOGICAL, CLINICAL AND POPULATION IMPLICATIONS.’

We have a great line-up of national and internationally renowned speakers who will be discussing cutting-edge basic, clinical and population research related to the rise in systolic blood pressure across the lifespan, biology of vascular aging, vascular aging in persons with disability, effects of intensive blood pressure lowering and vascular aging, cognition and carotid atherosclerosis, effects of inorganic nitrate supplementation on vascular function in heart failure, aging and disease. In addition, we welcome past president of the Artery Society Dr. Charalambos Vlachopoulos to give our closing Plenary lecture. Trainees will be delivering their research in oral abstract sessions and we will have tutorial lectures and hands on demonstrations by our sponsors of the most up-to-date devices for measuring vascular parameters. As always, we’ll have a robust debate with this year’s topic focusing on central vs peripheral blood pressure hemodynamics for predicting stroke prognosis.

This is the premier meeting to interact with international experts in the field of arterial structure and function in health and disease. Thank you for joining us.

Elaine M. Urbina, MD, MS
President,
North American Artery
Dear Colleagues,

It is with great pleasure that we invite you to take part in the Ninth Annual Meeting of North American Artery that will take place May 17-18, 2019 at the University of Iowa in Iowa City, IA. The theme for this year’s conference is “CHRONOLOGICAL VS. VASCULAR AGING: BIOLOGICAL, CLINICAL AND POPULATION IMPLICATIONS”.

NAA 2019 will feature Plenary Lectures, Keynote lectures, Symposia and Tutorial lectures by international leaders in the field and oral and poster presentations by young investigators and trainees. Our sessions and exhibits will be hubs of discussion, with opportunities to network with leading basic, clinical and population scientists, practicing physicians and other professionals from North America, Europe, Asia and Central and South America including members of our sister societies ARTERY (Europe), Pulse of Asia (Asia) and LATAM (Latin/South America). The major Symposia will focus on a wide variety of topics related to vascular aging and cardiovascular disease risk.

The meeting will continue to feature the popular debate session this year between two international experts Drs. Ernesto Schiffrin and Alberto Avolio on whether central or peripheral blood pressure is a better predictor of stroke with aging. We will continue with an increased number of oral abstract presentations from trainees and young investigators and the popular practical hands-on demonstrations given by sponsoring firms. All sessions, poster presentations and exhibit hall will take place in a single location, the Iowa Memorial Union Main Lounge, which will facilitate networking and interactions with vendors displaying their technologies, devices, and nutraceutical products.

We encourage you to help make the NAA 2019 Annual Meeting a valuable and successful experience by actively taking part in the education of the participants while supporting our efforts to raise awareness of the importance of arterial function as it relates to vascular aging and cardiovascular disease risk. You can follow us on Twitter @NAASociety or www.naartery.org for updates on the meeting.

Sincerely,

Gary L. Pierce, PhD
Conference Co-Chair

Bo Fernhall, PhD

- Central blood pressure with Mobil-O-Graph® is superior compared to results measured with any other device according to “Validation of non-invasive central blood pressure devices: ARTERY Society task force consensus statement on protocol standardization”, Eur Heart J. 2017 Oct 1;38(37):2805-2812
- Mobil-O-Graph® measurements can be set for in-clinic and out-of-clinic (24 hour) mode
- Medline (PubMed) is listing more Mobil-O-Graph® research data, than data from all other cuff-based devices together
- Mobil-O-Graph® – Gold standard in cuff-based measurement of central hemodynamics and arterial stiffness

**Mobil-O-Graph® officially distributed by ALF Distribution GmbH**

MISSION STATEMENT
The Mission of North American Artery Society is to:
• Support education on arterial structure and function appropriate to the various medical communities, such as scientific researchers, clinical specialists, primary care specialists, medical students, and pharmaceutical researchers, as well as the patient community;
• Develop mechanisms and venues for disseminating information on the understanding and application of arterial structure and function and its measurement among the various medical communities;
• Participate in and encourage the study of improved application of technologies in the measurement of arterial structure and function;
• Participate in and encourage clinical trials that develop the understanding of how arterial structure and function and its measurement can guide and inform patient selection and treatment;
• Guide and support efforts to standardize arterial structural and functional measurements for clinical practice and clinical/scientific studies;
• Direct efforts to include arterial structure and function measurements in appropriate national guidelines;
• Formulate a consensus statement regarding what is known in regards to arterial structure and function.

SOCIETY OBJECTIVES
North American Artery is a non-profit, non-partisan professional society dedicated to the encouragement, support, and understanding of vascular structure and function and its application to clinical medicine, research and pharmaceutical and medical device development. The Society Objectives are to:
• Support education on arterial mechanics appropriate to the various medical communities, such as scientific researchers, clinical specialists, primary care specialists, and pharmaceutical researchers, as well as the patient community;
• Develop mechanisms and venues for disseminating information on the understanding and application of arterial mechanics and its measurement among the various medical communities;
• Participate in and encourage the study of arterial mechanics in basic and applied research to further especially the clinical applications derived from an improved understanding of arterial mechanics;
• Participate in and encourage clinical trials that develop the understanding of how arterial mechanics and its measurement can guide and inform patient treatment;
• Guide and support efforts to standardize arterial mechanics measurements for clinical practice and clinical/scientific studies;
• Direct efforts to include arterial mechanics measurements in appropriate national guidelines;
• Provide the knowledge for the critical understanding and application of technologies to measure arterial mechanics.
JOIN OUR ORGANIZATION TODAY!

An active membership to this growing and influential research community is extremely beneficial to anyone associated with or interested in arterial research. As a member of North American Artery, you can view our member database, participate in our forum, as well as enjoy a host of other benefits.

Membership is open to all individuals and organizations that have a research, clinical, or scientific interest in arterial mechanics and hemodynamics. There are three (3) classes of membership:

- **Individual Voting Members** - $60.00
  - All dues-paying individuals are voting members.
- **Sponsor Member Organizations** - $500.00
  - This membership permits an organization to identify up to five (5) individuals from its organization be Individual Voting Members. Additional members may be added according to guidelines developed by the Executive Committee. An organization may have an unlimited number of members.
- **Student Members** - Free
  - This membership is open to all individuals who are currently still in training (residents, fellows, post-doctoral candidates). Student Members are non-voting members. A letter from the training director is required to be submitted with the application for membership.

Membership in NAA is based on a calendar year (July 1 – July 30). Payments of dues at any time during the year are considered dues for that calendar year. Membership renewal invoices are sent on June 1 and due by July 1.

MEMBERSHIP BENEFITS

Here are six specific reasons why you should join North American Artery Society (NAA) today:

**Be an active participant.**
NAA is active in developing a multidisciplinary approach to research in and applications of arterial structure and function. We recognize the value of many voices, opinions, and disciplines, and invite you to get involved.

**Enjoy reduced fees.**
Membership in NAA provides you with significant savings on registration fees for all NAA sponsored events.

**Join the Forum.**
Membership in NAA makes you part of the conversation on artery research and applications. You can contribute to and learn from presentation sin workshops, seminars, on-line videos, and other avenues of sharing information.

**Make key connections.**
Participation in NAA provides a focal point for developing working relationships with others active in the field.

**Lead the pack.**
NAA will be leading the development of consensus positions on a number of related issues, and participating in the design of upcoming studies in the field of artery research.

**Become a decision maker.**
NAA is an organized voice in the development of clinical applications of arterial research, including setting validation standards and application guidelines. As a member, you can be part of our voice to both the pharmaceutical as well as device manufacturing industries.
NAA MEMBERSHIP APPLICATION

(please type or print legibly and complete ALL information requested)

Last Name:__________________________ First Name:__________________________ MI:_____ Degree:___________

Affiliation:________________________________________________________________________________________________

Address:________________________________________________________________________________________________

City:______________________________________ State/Province:___________________ Postal Code:______________

Country (if not U.S.)__________________________ Telephone:_______________________ Fax:____________________

E-mail:________________________________________________________________________________________________

Please indicate Specialty

Physician Specialty:

☐ Cardiology ☐ Physiologist (Exercise)
☐ Allied Health Professional ☐ Scientist
☐ Physician Assistant ☐ Family Practice
☐ Endocrinology ☐ Nephrology
☐ Internal Medicine ☐ Other _________________________________

Membership Category

☐ Individual Voting Member - $60.00
☐ Sponsor Member Organization - $500.00 (Includes up to 5 Voting Members. List names below.)

If applying for Sponsor Member Organization membership, please include up to four (4) additional individuals who will also be Voting Members.

1) Name: __________________________ Email Address: __________________________
2) Name: __________________________ Email Address: __________________________
3) Name: __________________________ Email Address: __________________________
4) Name: __________________________ Email Address: __________________________

Payment Information: No CASH or BANK TRANSFERS. Membership dues may be paid with VISA, MasterCard, American Express, Check or Money Order. Checks and money orders must be drawn on American Banks and must be in US Dollars.

Payment Method: ☐ VISA ☐ MasterCard ☐ American Express ☐ Check payable to North American Artery Cardholder’s Name:__________________________ Exp. Date:____________

Credit Card Number Card:__________________________ Verification Code:_______

Cardholder’s Billing Address:____________________________________________________________________________

Cardholder’s Signature:__________________________________________________________________________________
