Regional Associate Degree for Transfer (ADT) Analysis

Regional Profiles of Postsecondary Institutions and Transfer Pathways
Conducted by Student-Ready Strategies (SRS)

As part of ongoing work to support the AB 928 Committee and its study groups, SRS created regional transfer profiles, based on the 12 regions utilized by California Competes. For each region, SRS compiled the following information from the footnoted sources:

- Poverty Rate[1]
- Counties[2]
- Community Colleges[3]
- Public Universities[4]
- Private Colleges and Universities[5] - colleges and universities listed if they accept ADTs, with a note for those that have a formal MOU in place to accept ADT earners as juniors
- Number of Complete Transfer Pathways in the region
- Number of Incomplete Transfer Pathways in the region

To count the number of complete and incomplete transfer pathways for a region, SRS created a combined data set that included regional data on the ADT offerings by the community colleges[6], the ADTs accepted by the CSUs[7], and the ADTs accepted by AICCU institutions with an active MOU with the community colleges[8]. A pathway was considered complete for a given discipline if a community college in the region offered the ADT and a CSU and/or AICCU institution in the region accepts the ADT in the same discipline. Incomplete pathways included disciplines for which the community colleges offer the ADT but no 4-year institution accepts it, as well as disciplines for which one or more 4-year institutions accepts the ADT but no community college offers it.
