The Registry shall also have the discretion to undertake such actions as cancellation, transfer, locking, or suspension of a name subject to abusive uses. Such abusive uses create security and stability issues for the registry, registrars and registrants, as well as for users of the Internet in general. The Registry defines abusive use as the wrong or excessive use of power, position or ability, and includes, without limitation, the following:

v. Fast flux hosting: Use of fast-flux techniques to disguise the location of Websites or other Internet services, or to avoid detection and mitigation efforts, or to host illegal activities. Fastflux techniques use DNS to frequently change the location on the Internet to which the domain name of an Internet host or name server resolves. Fast flux hosting may be used only with prior permission of the Registry;
vii. Botnet command and control: Services run on a domain name that are used to control a collection of compromised computers or “zombies,” or to direct denial-of-service attacks (DDoS attacks);
viii. Distribution of child abuse images; and
ix. Illegal Access to Other Computers or Networks: Illegally accessing computers, accounts,
or networks belonging to another party, or attempting to penetrate security measures of another individual's system (often known as “hacking”). ii. The Registry is not required to give reasons for action taken as per the above but may do so from time to time where the Registry deems it appropriate at its absolute discretion.

13. Additional Terms and Restrictions

The Registrant will abide by all applicable laws regarding privacy, data collection, consumer protection (including in relation to misleading and deceptive conduct), fair lending, debt collection, organic farming, disclosure of data, and financial disclosures.
