

Atlas

Atlas Capital Team Inc.

Atlas is an innovative FinTech company, designing technology-driven solutions addressing macro, geopolitical and climate risks. Leveraging FinTech, AI, and Climate Tech, Atlas aims to create a globally accessible stablecoin – the Atlas Climate Token – underpinned by an index trading tangible, safe haven assets. The Atlas Index powers an investment strategy that is designed to deliver inflation protection and monetary stability, whilst investing in long term socio-economic and environmental prosperity. Atlas enables wealth preservation, global financial inclusion, and the deployment of capital into climate resilient communities for all.

Overview

Pegged to a carefully chosen portfolio of liquid real-world assets—climate-resilient REITs, strategic commodities, inflation-hedged sovereign bonds, and gold—The Atlas Climate Token is a democratized modern investment solution for users worldwide.

The global macro-economic environment faces significant, intensifying risks in the shape of climate degradation, prompting investors to seek ways to protect and grow their assets in the face of an uncertain future.

Back tested to 1971, ACT is a safer and stronger currency

Positive performance in 48/51 years, with 8.2% avg returns & 6.7% avg volatility

The Atlas Index uses advanced AI/ML and data processing tools to track and measure the price performance and volatility of liquid, stable, and negatively correlated legacy assets that have formed the foundation of the US Dollar (Gold, Real Estate/REITs, US Treasuries). Atlas offers an investment strategy focused on integrating tangible, regulated safe haven assets with TradFi and DeFi products, enabling scalable distribution, adoption and seamless integration to provide a more stable complementary hedge to US dollar instruments.

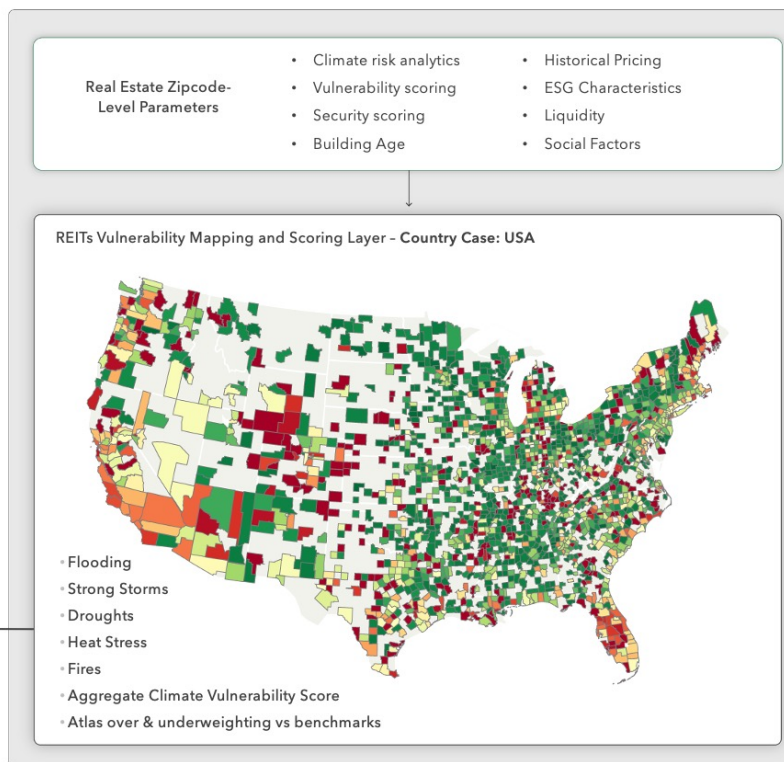

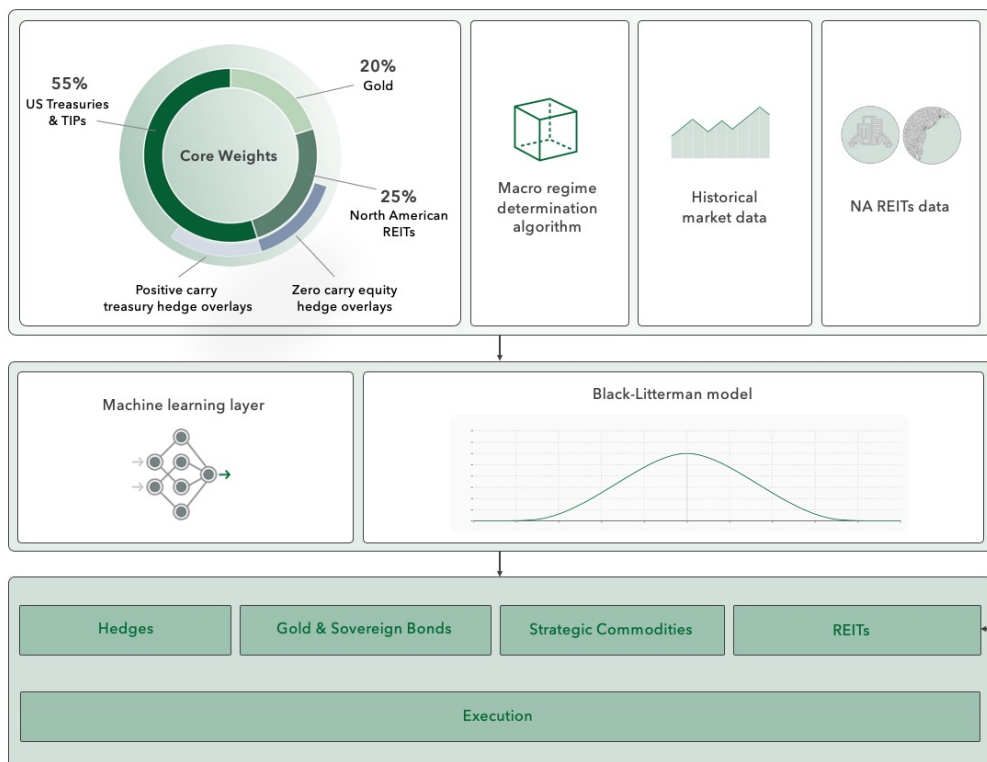

ACT Stablecoin offers a higher performing, more stable alternative

Atlas Performance vs the US Dollar

Value of Atlas Portfolio vs the US Dollar, since 1991 (inflation adjusted)

Atlas Portfolio has quadrupled its value in the last three decades, while the dollar has halved

The Atlas Index is a thematic investment strategy to accelerate the global transition to a net zero economy by investing in treasuries, gold, food & water, green metals, resilient real estate and sustainable communities that have been the foundation economic stability for centuries. The **Atlas Climate Basket** reflects the Atlas belief that traditional real assets can be new and innovative and need to be delivered in a manner that keeps pace with changing investor needs in volatile markets.

Atlas is building an institutional-grade stablecoin with inflation resilient attributes, backed by real world assets

Team

The Atlas team represents seasoned executives from the public and private sectors, with deep experience in government relations, investment management, technology, blockchain and venture capital.

Time to ACT

We believe fintech innovation holds the most solutions for mobilizing capital at scale - for wealth preservation, climate adaptation and building resilient, prosperous communities. Supported and distributed through top-tier financial and technology partners, Atlas presents an exciting opportunity for socially responsible investing, attracting partners who seek to make a positive impact on the world. The Atlas Climate Token is designed for large scale adoption aiming to mobilize private capital in funding climate adaptation and sustainability and become a leading, regulated digital token backed by real assets. Join us in re-imagining climate finance and asset safety. Together, we can build a more stable and sustainable financial future for global communities.
