

Beyond Information Protection 365 (BIP365)

HARMONIZES YOUR WORKPLACE

Usability

Centralization

Quick upstart

BIP365 is an application that collaborates with your current Microsoft Office 365. Documents created or uploaded to BIP365 can easily be found in other Office 365 applications such as Teams, Word, Excel etc.

BIP365 gathers several separate systems into one platform, such as electronic signatures and Intranet/CMS.

BIP365 contains pre-configured document templates and structures for all departments to quickly be able to start working and structuring company information.

BIP365 provides the building blocks required to build and expand your business.

BIP365 saves you money by offering the same protection + added functionality with a lower tier M365 license.

ADDITIONAL FEATURES IN BIP365

- Seamless Microsoft365 integration
- Unlimited storage capabilities
