Ryan Large, *DVAuction Representative*. . 308-340-9859

PHONE BIDDING

Phone bidding options available, please contact Kale or Kim Kretschman for more information.

TERMS AND CONDITIONS

Cattle will sell under the Standard Terms and Conditions as recommended by the American Angus Association.

RETAINED INTEREST

Rafter T Angus will be retaining a one-third revenue sharing interest in every bull selling in the sale. Full possession and salvage value sells on all bulls.

SUPPLEMENTAL INFORMATION

A supplement data sheet will be available sale day with scrotal measurements, ultrasound data and other updates. Announcements from the auction block take precedence over catalog information.

SALE LOCATION

Buffalo Livestock Marketing (*same place, new name*)
44 T W Rd
Buffalo, WY 82834

SALE DAY SCHEDULE

9:00 AM Bulls on Display
11:30 AM Free Lunch
1:00 PM Sale Begins

LIABILITY

All persons who attend the sale do so at their own risk. Rafter T Angus and Buffalo Livestock Auction assumes no liability, legal or otherwise, for any accidents which may occur.

ACCOMMODATIONS

Hampton Inn, Buffalo. 307-684-8899
Comfort Inn, Buffalo. 307-684-9564

TRUCKING

Delivery of all bulls is free of charge to central points in Wyoming and adjoining states. Delivery of bulls will begin Mid-March.

INSURANCE

Bill Pelton, Stockmens Ins. Agency 406-671-5100
We strongly encourage our buyers to purchase insurance on their bulls against death or injury. We cannot guarantee them against an act of God or sickness that develops while he is in your control. We do guarantee our cattle to be healthy sale day and when their arrive to your ranch. We recommend Bill Pelton, but he will not be available sale day, you may contact him at your convenience and set-up a policy per your request.

WINTERING

All bulls will be wintered free of charge at our ranch. Delivery will begin in mid-March. If you need a later delivery date, feeding arrangements can be made at the buyer's expense.

HERD HEALTH

All cattle sell with proper health papers for interstate shipment. A rigid herd health program is followed. All cattle have been calf hood vaccinated with 7-way Somnus at branding and at weaning along with IBR, BVD, BRSV, Pasturella and a Dectomax Pour On.

FERTILITY

The bulls will be fertility tested by a licensed veterinarians, Drs. Jay and Brandi Hudson, prior to delivery.

FIRST BREEDING SEASON GUARANTEE

Rafter T Angus guarantees bull(s) which sell for \$3,000 or more for their first breeding season (60 days from turn out) provided the bull(s) are managed properly and are kept in acceptable nutritional and physical health. Upon delivery Rafter T Angus guarantees the bull(s) are sound and fertile. Should death or injury occur to the bull(s) it should be documented and verified by a licensed DVM. Rafter T Angus will either give credit to the buyer or replace injured bull(s) at their discretion, if a comparable bull(s) is available.

SIGHT UNSEEN GUARANTEE

We guarantee all bulls purchased sight unseen. If you don't like the bull at the time of delivery, we'll take him home.

CALVING EASE RECOMMENDATION

Throughout the catalog we have selected bulls we feel are definite calving ease and should be considered to use on heifers. These notes can be found in the footnote section of the lot boxes. This suggestion is based on a number of factors including pedigree, birth weight and our knowledge of the sire and dam. All buyers should take into account their own program when considering these recommendations. Please talk to us prior to the sale if you have any questions.

Greetings **Cattlemen!**

Please consider this a personal invitation to our 7th annual bull sale. Getting to know our customers and being familiar with their individual programs is a highlight in this business. A deep and heartfelt thank you for trusting us to be part of your operation

Over the past year, cattle producers have seen drastic changes in our industry. The rising cost of all our expenses is making us get creative with the money we put into our cows. The high cost of feed forces our cows to stay out in the hills longer. Prior to calving, we expect them to rough it, with very little supplement. The cows that do not raise a good calf every year do not stay in our herd.

The Angus breed uses the word "balanced". To us, this means staying focused on the maternal traits that we know are important, while including traits like performance and carcass. Finding outcross sires that have "balanced" EPDs is a challenge. This year we have a new lineup of AI sires that we feel offer genetic merit with phenotype. In the past, we have always kept the carcass EPDs in mind when selecting AI genetics but never placed a heavy emphasis on it. Due to the drought, last year we culled deeper than normal into our replacement heifer pen. The culled heifers were left in the feedlot to be finished. We were pleasantly surprised that 80% of these heifers graded prime and 20% were CAB, with a 63.7% carcass yield.

Our cattle are held to a very high standard for fertility, reproductive soundness, and longevity. We work very closely with our nutritionist and Drs. Jay and Brandi Hudson to develop sound-footed and highly fertile bulls. The bulls will be given a complete breeding soundness exam before they are delivered. If you live in Wyoming or surrounding states, the bulls will be delivered to central points for free beginning mid-March 2022.

We represent our cattle honestly, hoping to build long-term relationships with our customers. Thank you to those of you who have put your trust in our genetics. We greatly appreciate your business. If you're in the area before or after the sale please stop by to look at the bulls. The bulls have all been videoed and those videos can be seen on our website. If you have any questions about our program or are just needing more information please call us or go to our website, www.raftertangu.com.

We can't wait to visit with you on sale day. Please join us for lunch starting at 11:30 AM.

The Kretschman Family,
Kale, Kim, Galen and Zane

RTA COALITION 074

EPD Definitions

PRODUCTION EPDs

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL EPDs

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

MANAGEMENT EPDs

Docility (Doc), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Claw Set EPD (Claw), is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

Foot Angle EPD (Angle), is expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

CARCASS EPDs

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

Footnotes and Calving Ease Recommendations

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they have recorded an average of 15 progeny, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation at www.angus.org.

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen or the HD50k by partner Zoetis.

LOT 1

Sons of
U-2 COALITION 206C

Lots 1 - 10. Coalition stamps his progeny with his good hip, correct structure, and expressive muscle shape. Sons are solid-performing, good-looking bulls with modest birth weights. Daughters are consistent in their type - deep ribbed, good structured, and feminine fronted, with impeccable udder quality and productive!

 276 is the product of a really nice first calf heifer. He is moderate, stout and boasts a double-digit CED. We have been impressed with this calf all summer. Suitable for heifers.

LD CAPITALIST 316

Sons of

LD CAPITALIST 316

Lots 11 - 15. LD Capitalist 316 is a calving ease bull that is phenotypically phenomenal! Heavy muscled, bold ribbed, and super sound footed - he couples extreme calving ease with performance and power. Here is a bull to inject muscle, substance, and shape with balanced EPDs and the look we like.

2129 is the embryo calf out of a 12-year-old proven donor cow. In the last nine years, his dam has produced 7 bull calves that have all been in the top 10 of their respective sales. Lot 15 has 7 genomic traits that are in the top 25% of the breed.

LOT 15

Watch & bid online for **FREE** at

DVAuction
Broadcasting Real-Time Auctions

Can't make the sale? Bid from home with DV Auction's "real-time" internet bidding service!

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

292 is a phenotypically impressive bull out of a perfect-footed dam. His mother has a beautiful udder and is one of our favorite cows. Suitable for heifers.

LOT 25

Sons of CONNEALY DRY VALLEY 6849

Lots 26-30. Dry Valley is an extremely heavily muscled bull that is straight topped, clean fronted and athletic. His pedigree features bulls that dominate for power and muscle expression. He is stamping his progeny with the same look.

Sons of RTA CASH 026

Lots 37-39. This is a bull that we are tremendously proud of. He is owned by Dennis Edwards of Gillette. Cash is powerfully built and stunning from all angles. He is extremely docile. His dam and grandam have both had a huge influence on our herd.

Dam's Production: WR 10@106

We have been excited about this bull since the day we AI'd his mother. His dam is a 14-year-old cow that never disappoints us. His sire was the high-selling bull in our 2021 sale. 297 is a powerhouse with a tremendous disposition.

Suitable for heifers.

Sons of RTA COALITION 074

Lots 40-42. 074 was a sale topper in our 2021 sale. He was purchased by Leroy and Kris Malli. His ten-year-old dam was flushed heavily and is still producing well in our herd. The flush mates to this bull ran at elevation and papped very low.

This embryo calf is out of the youngest cow we've ever flushed. She impressed us early on with her look and performance. He should sire calves that are easy fleshing with a lot of stout.

One of our favorite bulls from the 2019 sale. He is big-hipped, easy fleshing with tremendous depth and capacity. With his breed-leading claw and angle EPDs, he should be a foot improver. This bull is out of a cow that has been a landmark in our herd. He is a maternal half-brother to the sire RTA Cash 026. 846 is the most docile bull we have ever used.
