

Design Challenge

Team Names: _____

Imagine you could change anything on the street outside your school. What would you add or remove to make it safer, greener, and better designed for you? A rain garden? A parklet? A mural?

Today we will be using Streetmix, an online tool created to help us reimagine our streets.

Step 1: Think back to the Walk Audit and/or Spatial Equity Exploration. What were some of the biggest challenges you identified? What ideas do you have for the changes you want to see to your street?

Challenge

Change/Solution

1. _____
2. _____
3. _____

1. _____
2. _____
3. _____

Step 2: Using Streetmix, work with your team to co-design a new street for your school. Try out different street elements and settle on your favorites.

Street Width: _____

Street Capacity: _____ people/hour

Step 3: Reflect and Present - What was the biggest challenge on the street your team tried to fix? How do you think these changes would help make the street better for you and your community? Brainstorm your share out below:
