Design Challenge

Team Names: _____

Today we will be using Streetmix to create a model of how you would redesign a street outside of your school. What features would you add or remove to make the street greener, safer, more accessible, and enjoyable for everyone?

Step 1: Think back to the Walk Audit and/or Spatial Equity Exploration. What were the biggest challenges you identified on your school street? What ideas do you have for the changes you want to see?

<u>Challenges and Solutions</u>

1. _____

   _____

2. _____

   _____

3. _____

   _____

Step 2: Using Streetmix, work with your team to co-design a new street for your school. Try out different street elements and settle on your favorites.

Street Width: _____

Street Capacity: _____ people/hour

Street Feature	Why did you choose this change?

Step 3: Reflect and Present - What was the biggest challenge on the street your team tried to fix? How do you think these changes would help make the street better for you and your community? Were there any elements you wanted to add but couldn't find the feature on Streetmix? Brainstorm your share out below:

_____
_____
_____
_____
_____
_____
_____

Step 4: Listen and Offer Feedback - What do you think about the other teams' presentations? Offer constructive feedback on their proposed design solutions:

Plusses: things I really liked	Deltas: suggestions I would offer
