

Secure Microsoft 365 and **maximise your investment**

Get visibility of your compliance and security posture with the Microsoft 365 Assessment Accelerator

Turbo charge your Microsoft 365 subscription, because even high-performance machines need a service every now and then.

With a light touch engagement, you'll get an informative, detailed report with key insights into your Microsoft 365 configuration to help you understand where you are right now, and the opportunities for improvement. Discover areas that could be impacting your security posture as well as security services or features not yet enabled.

Discover any missed configurations that may be turning your "check engine" light on.

The Microsoft 365 Assessment Accelerator scans your entire environment to show you which apps and services are switched on or off to help you maximise your Microsoft 365 investment.

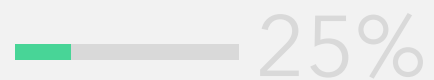

Compare your tenant settings to a secure baseline developed in conjunction with Microsoft and the Australian Federal Government.

In just 2 weeks you will gain insights and an understanding of your Microsoft 365 tenant security posture, vulnerabilities, risks and opportunities for optimisation.

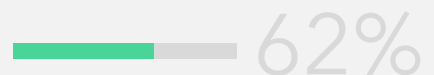

Understand the critical path and recommendations for the next steps to accelerate to 'Zero Trust'.

Is your organisation ready to amplify your Microsoft 365 subscription?

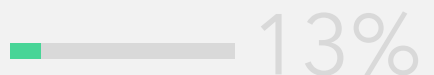

Ransomware accounted for 25 percent of breaches (a 13 percent increase from last year) in 2021. The rise was as big as the last five years combined.

Supply chain attacks were responsible for 62 percent of system-intrusion incidents demonstrating its rise in prominence.

13 percent of breaches due to **misconfigured cloud services** by the person or people responsible for setting up the system.

The Microsoft 365 Assessment Accelerator will navigate your journey to a more secure and safe environment for your users.

Get under the hood to improve your security baseline within your Microsoft 365 environment.

Kick the tyres on new products and services by understanding what's already deployed.

Secure your investment by understanding which parts need to be tweaked or require a tune up.

Why does it matter?

There's a reason why cyber security is now more important than ever. Our businesses depend on it. One simple misconfiguration can leave an organisation vulnerable.

With thousands of security configuration settings in Microsoft 365, it can be difficult knowing where to start when you need to assess your security.

Instead of a project taking weeks or months, the Microsoft 365 Assessment Accelerator can provide a targeted assessment in just two weeks.

For existing environments, the Microsoft 365 Assessment Accelerator performs an assessment against a secure baseline developed in conjunction with Microsoft and the Australian Federal Government and provides recommendations to remediate and uplift the security posture as required.

Approach:

- Simplified onboarding of the assessment tool to connect to your Microsoft 365 tenancy
- Proven expertise to operate the tool and provide you advice
- Short and sharp with a focused outcome including recommendations and next steps
- Reach out to your Fujitsu representative to find out more
