Studies have found that participants in a job training program were 20% less likely to reoffend. A study by the Urban Institute found that community-based programs reduced recidivism rates by up to 30%.

Community is key
A study by the Urban Institute found that community-based programs reduced recidivism rates by up to 30%.

We do better together
A study by the Center for Court Innovation found that mentoring programs reduced recidivism rates by up to 22%.

Community engagement
Studies have found that participants in a job training program were 20% less likely to reoffend.

WHO WE ARE
We are returning citizens, mentors, professionals, Restorative Justice facilitators/practitioners, and circle keepers. Our lived experience and successful reintegration allow us to reach and impact young men who have been affected and traumatized by crime, fatherlessness, poverty, etc.

WHY THIS MATTERS
We understand the importance of providing education, job training, emotional support, community-based programs, and mentoring to returning citizens in order to reduce their likelihood of reoffending.

- Community is key
  A study by the Urban Institute found that community-based programs reduced recidivism rates by up to 30%.

- We do better together
  A study by the Center for Court Innovation found that mentoring programs reduced recidivism rates by up to 22%.

- Community engagement
