Flu vaccinations offered this fall at schools across Southeast Minnesota

The School-Located Immunization Program will provide flu vaccinations in Southeast Minnesota schools this fall. Students in kindergarten through grade 12 are eligible to participate at:

- Most public and private schools in Olmsted County.
- Kasson-Mantorville, Hayfield and Triton public schools in Dodge County.
- Pine Island public schools.
- Most public and private schools in Mower County.

Registration is required to be vaccinated for flu.

Flu vaccinations will be offered as an injection at all sites, and nasal spray flu vaccine will be offered as available. Nondrug, pain-lessening options will be offered.

Register your child

Registration opens Aug. 9 and will continue through Sept. 13.

Online registration is preferred. It's quick, especially for those with two or more children.

Paper forms will also be available at Meet the Teacher, Step Into Learning and Back to School events and in the office at your child's school.

**Mayo Clinic Orthopedics and Sports Medicine to offer Saturday fall sports injury clinics**

Mayo Clinic Orthopedics and Sports Medicine will provide a Saturday morning injury clinic for Rochester-area middle school, high school and college athletes injured during recent sports activities. The clinic is available to all athletes from schools in Southeast Minnesota, Western Wisconsin and Northern Iowa.

The clinic will be open each Saturday between Sept. 2 and Oct. 14 starting at 8 a.m. on the third floor of Dan Abraham Healthy Living Center in Rochester.

Appointments are preferred and can be scheduled by calling 507-266-6690. Phone lines open at 7:30 a.m. each Saturday. Walk-ins are welcome. The last available appointment is at 11 a.m. Insurance will be billed for these visits.

Physicians, physical therapists and athletic trainers will staff the clinic. Services include X-rays, evaluation and management of acute injuries, splinting, bracing, crutch fitting and instruction, and rehabilitation.

A parent or guardian must accompany athletes under 18.

For more information, call 507-266-6690.

**Fall Sports safety: Kids and concussions**

The end of summer break is rapidly approaching, which means many kids are preparing to start the fall sports season. Unfortunately, some kids will experience injuries throughout the season. One injury that many people are concerned about is a concussion. Many people have heard of concussions from the news, social media, friends and many other sources. Here are some key points about concussions:

**What is a concussion?**
A concussion is a traumatic brain injury caused by a direct blow to the head, neck or body that causes the brain to shake inside the skull and results in temporary disruption in brain function. This injury results in a variety of different signs and symptoms that may present immediately or evolve over minutes to hours.

**What are the signs and symptoms of a concussion?**

Concussions don't show any abnormalities in standard head imaging studies such as a CT or MRI, so clinicians rely on recognizing certain signs and symptoms to diagnose them.

These signs and symptoms include:

- Headaches.
- Neck pain.
- Light or noise sensitivity.
- Dizziness.
- "Don't feel right."
- Difficulty concentrating or remembering.
- Nausea or vomiting.
- Trouble falling asleep.

If you or your child's coach suspect your child has a concussion, the child should be removed from the sport or activity immediately. A medical provider should evaluate your child promptly — whether that be an athletic trainer on the sidelines or a healthcare professional at your child's clinic.

**Mayo Clinic earns top U.S. News rankings, continuing to set the standard as the best hospital in the nation**

Mayo Clinic is top-ranked in more specialties than any other hospital and has been recognized as an Honor Roll member, according to [U.S. News & World Report’s 2023-2024 “Best Hospitals” rankings](https://www.mayoclinic.org/). Although U.S. News no longer numerically ranks hospitals on its Honor Roll, it will continue to publish a list of the nation’s best hospitals. Mayo Clinic in Rochester has been on this list since it was first published in 1990.

"We are honored that Mayo Clinic is once again the nation’s top-ranked hospital across the most specialties," says Gianrico Farrugia, M.D., Mayo Clinic president and CEO. "Our staff work
tirelessly to deliver the highest level of care to every Mayo Clinic patient. Today's recognition is
a testament to them and their daily commitment to providing hope and healing to those in need,
and to their creativity, ingenuity and drive to create the future of healthcare."

U.S. News continues to rank hospitals regionally within states and major metro areas. Mayo
Clinic again ranks No. 1 in Minnesota, Arizona and Florida and is the top hospital in the Phoenix
and Jacksonville metro areas. Mayo Clinic Health System in Eau Claire, Wisconsin, has been
recognized as a "Best Regional Hospital" in Northwestern Wisconsin.
