The cumulative burden of exposures to chemical and non-chemical stressors in LMICs through the lens of MCH

Sponsored by the University of Pittsburgh School of Public Health

In many low and middle income countries, pregnant women and their children experience adverse outcomes from exposures to chemical and non-chemical stressors that have a profound impact on their health and wellbeing.

Join Maureen Lichtveld, MD, MPH, Dean, University of Pittsburgh School of Public Health, and other experts as they share the latest findings from across Latin America and the Caribbean, and discuss the way forward.

CUGH 2024 SATELLITE SESSION

THURSDAY MARCH 7
