MacBook

This process allows Safari and other browsers that use the macOS certificate store to get access to the certificate.

1. In the **Keychain Access** application, select either the login or System keychain.

2. Drag-and-drop the certificate file into the **Keychain Access** application.

3. If prompted, type the name and password for an administrator user.

4. Right-click the certificate and select **Get Info**.

5. Expand the **Trust** category.

6. In the **When using this certificate** drop-down list, select **Always Trust**.

7. Close the certificate information window.

8. Type your administrator password to confirm your changes.
