This Cookies Policy describes the different cookies and other tracking technologies we and our partners use in connection with this website and other digital properties (the “Services”) managed by [Data Controller] (the “Service Owner”). When we refer to “we”, “our” or “us” in this Cookie Policy, we are referring to the Service Owner. When we refer to “you” or “your” we refer to you as user of the Services.

We may modify this Cookie Policy at any time. When we make changes, we will revise the “last updated” date at the top of this Cookie Policy. When relevant we will notify you in a more directed manner via our homepage, email or other communication. We encourage you to review the applicable version of this Cookie Policy whenever you use the Services.

What is a cookie and what other tracking technologies do we use?

A cookie is a small file that operates the website you are visiting (“first-party cookies”) or by other companies (“third-party cookies”). For example, we partner with third-party analytics providers which set cookies when you visit our websites. This helps us understand how you and others are using our websites so that we can improve them. These cookies may retrieve some personal data and related information from your device.

As well as that we can use other type of tracking technologies that allow us to understand your use of our Services and interact with other digital services. Some examples of tracking technologies are pixels (small images on a web page or in an email. Pixels collect information about your browser or device and can also set cookies); local storage (allows data about your browser or device to be stored locally on your browser or device and includes HTML5 local storage and browser cache); SDKs (blocks of code that may be installed in our mobile applications help us understand how you interact with our mobile applications and collect certain information about the device and network you use), etc.

From now on we will refer to all these cookies and tracking technologies as Cookies.

How do we use Cookies?

We and partners use cookies, as described above, for different purposes depending on the type of cookie. For instance, we use Strictly Necessary Cookies that help ensure our services function properly, to remember your settings and preferences, such as your language preferences, to help identify and prevent security risks, or to help us understand and improve our services. You can set your browser to block or alert you about these Cookies, but some parts of the Services will not then work.

We also use Functional Cookies to enhance the functionality of our Services and personalise them. If you do not allow these cookies, then some or all of these Services may not function properly.

As well as that we use Analytics Cookies to recognize you when you visit our Services, and to collect information such as the number of visits, which features or pages are popular, and measurements about an advertising campaign’s success. This allows us to ensure our Services are functioning properly, to improve the Services, and to provide and measure advertisements. You can reject these Cookies but that will mean the ads and content may be less relevant to you.

We also use Targeting Cookies to tailor advertising served to you in our Services based on your browsing activity and location. This Cookies may be set up by us or by our third-party partners and may be used by such companies to build a profile of your interests and show you relevant adverts on other websites. If you do not allow these Cookies, you will experience less targeted advertising. Finally, we may use Social Media Cookies to enable you to share our content in your social networks which may also impact the content and messages you see on other websites. If you do not allow these Cookies, you may not be able to share content in your social networks.

Cookies may be kept stored on your browser or computer hard drive for as long as you keep such browser active, for session Cookies, or for a longer period, for persistent Cookies (for more information see the Cookie list available on Privacy Preference Centre).

For a full list of our cookies, its functionalities, whether they are first party of third party as well as their duration, please go to Privacy Settings Centre/Manage Cookies.
### Your Cookies Settings

You have the following options to control or limit how we and our partners use cookies and similar technologies for advertising and analytics purposes. You can change your cookies preferences within the Cookie Setting button available at the footer of the website.

Although most browsers and devices accept cookies by default, their settings usually allow you to clear or decline cookies. If you disable cookies, however, some of the features of our websites may not function properly. More information about cookies is available at [www.allaboutcookies.org](http://www.allaboutcookies.org). To prevent your data from being used by Google Analytics, you can install Google’s opt-out browser add-on. You can also access your Google Ads settings to control what data Google uses to show ads to you.

**Contact Us** If you have any questions about our use of cookies and similar technologies, please contact us at: crolle@bahamasolympic.com

### List of Tracking Technologies

The below is a list of tracking technologies that OCS/IOC will implement depending on the specific OCS Technology project that Partner wishes to include in their digital services. Please review the specifics related to the OCS Technology to be implemented.

<table>

<tbody>
<tr>
<td>IOC Behavioural Data Tracker</td>
<td>dl_anonymous_id</td>
<td>This cookie is used by the IOC to identify the user so that user actions on the site may be collected and used by the IOC to build a holistic view (profile) of the user, thereby contributing to a data model. This enables us to improve marketing efforts on the Olympics digital properties. Particularly, data derived from this cookie is used by the International Olympic Committee (&quot;IOC&quot;) to build a profile of you and your interests, to build campaign audiences that include you or people who share a similar profile to you, and to deliver relevant advertising and other content to those audiences on IOC digital platforms as well as sites and apps owned by other organisations. For more information on how the IOC processes personal data, please see <a href="https://olympics.com/en/privacy-policy">https://olympics.com/en/privacy-policy</a></td>
<td>Marketing and Advertising</td>
</tr>
<tr>
<td>IOC Behavioural Data Tracker</td>
<td>dl_anonymous_id</td>
<td>This cookie is used by the International Olympic Committee (&quot;IOC&quot;) to measure this platform’s traffic, and to better understand how Olympics-related content is being consumed by the platform’s visitors. For more information on how the IOC processes personal data, please see <a href="https://olympics.com/en/privacy-policy">https://olympics.com/en/privacy-policy</a></td>

</table>

1 These categories are the ones we currently have in IOC Digital sites, and the description is as follows:

**Performance and Analytics Cookies**: collect certain information that allow us to improve the performance of our Digital Platforms and help us to provide you with what we believe to be the best user experience. These cookies allow us to count visits and traffic sources so we can measure and improve the performance of our Digital Platforms. These cookies also allow us to build a profile of your interests and browsing patterns, for the purpose of personalising your experience and offering you the most relevant content. They help us to know how our Digital Platforms perform and which pages are the most and least popular and to see how visitors move around the Digital Platforms. If you do not allow these cookies, we will not be able to learn more about the use and performance of our Digital Platforms and your experience will not be as personalised and relevant to you.

**Marketing and Advertising**: cookies that enable the tailoring of online advertising based on your browsing activity and the location from which you access our Digital Platforms. These cookies include cookies set by our advertising partners. The cookies are used (i) by us to measure traffic to our Digital Platforms and for the purpose of personalising services and offering you the most relevant content, and (ii) by us and by our partners to build a profile and to show you and other people relevant adverts and content both on our Digital Platforms as well as on other sites. If you do not allow these cookies, you will continue to see online advertising and content, but that advertising and content will be less tailored to you.
