

**BAYANI DESIGNS**

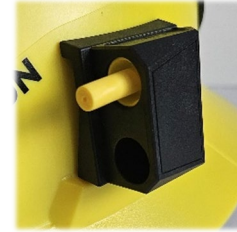

## CAPABILITY STATEMENT

Rifle Mount Earplugs

MOLLE Mount Earplugs

Helmet Mount Earplugs

## BUSINESS SUMMARY

BAYANI DESIGNS develops and provides innovative Personal Protective Equipment (PPE) for ear protection. Founded in the face of career ending injuries, we designed our earplug housing to make it easier and more practical to protect your hearing.

Since 2023, BAYANI DESIGNS has focused on hearing protection storage through our patent pending line of "Ready Ears". We also provide ANSI Type II safety helmets (hardhats).

## KEY DIFFERENTIATORS

According to military personnel, the standard issued earplug case quickly breaks, falls off, or is difficult to access. This leads to higher cases of tinnitus, hearing loss, and sound sensitivity. Tinnitus and hearing loss are always there and can be devastating to quality of life.

**New Way:**

\*CAD Rendering

Bayani Designs introduces a solution to the "old way". Using high strength polymer, our Ready Ears MOLLE Mount unit is one of many mounting options to store earplugs for quick, clean, and easy access. This helps save people's hearing.

**Old Way:**

## WHO WE SERVE

▪ Army ▪ Air Force ▪ Coast Guard ▪ Marine Corps ▪ Navy ▪ Law Enforcement ▪ Army Corps of Engineers ▪ Naval Surface Warfare Centers ▪ DOT ▪ Agencies with loud work conditions
