

FOND FAREWELL
Honoring Pets, Preserving Nature

Reduce Your Carbon Paw Print

WHY GO WITH AQUAMATION?

- A flameless process that uses water instead of fire
- Over 90% energy savings when compared to flame based cremation
- No direct emissions of harmful greenhouse gases or mercury
- No burning of fossil fuels
- 20% more ash remains returned to the family

WHY CHOOSE US?

Inspired by the need for a more eco-friendly approach to pet afterlife care, Fond Farewell was born. Our mission became clear: to combine our love for animals with our commitment to preserving the planet. We set out to provide a service that not only provided a loving and dignified farewell but also minimized the carbon footprint left behind.

CONTACT US

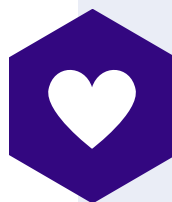

PET AQUAMATION

Aquamation is a water-based alternative to traditional flame cremation. It is a gentle and environmentally friendly process that uses a combination of water, heat, and alkaline solution to accelerate the natural decomposition of a your furry loved ones.

AQUAMATION COST

Despite its eco-friendly benefits and the additional amount of ashes you receive, aquamation is priced similarly to conventional methods, making it an accessible option for pet owners seeking a more sustainable farewell for their beloved companions.

SAME DAY SERVICE

If you choose to go through with Fond Farewell's aquamation service, we will respectfully collect your furry friend from your vet's care. Each stage of the process will be communicated with you, and any mementos, such as urns or pawprints, will be returned to your vet once the process is complete.
