

Your Soil Carbon Farming Journey

CARBON SYNC
REGENERATIVE AGRICULTURE

Steps

ON-FARM MEETING - QUESTIONS AND DATA

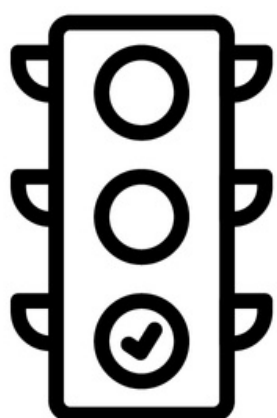

Is Soil Carbon Farming for you? we sit down and listen to you and your goals. We show you what is possible.

CONTRACT SIGNING

Once you're happy with the details of your project, we enter into a 25-year contract with you.

4-8 wks

PROJECT DECLARATION

After 3-6 months, we'll hear back from the Clean Energy Regulator with news of your project's declaration and permission to start.

PROJECT REGISTRATION INC LAND MGMT STRATEGY

We prepare a Carbon Farming Plan and Land Management Strategy that form the basis of submission to the CER.

3-6 mths

BASELINE SOIL SAMPLING & LAB ANALYSIS

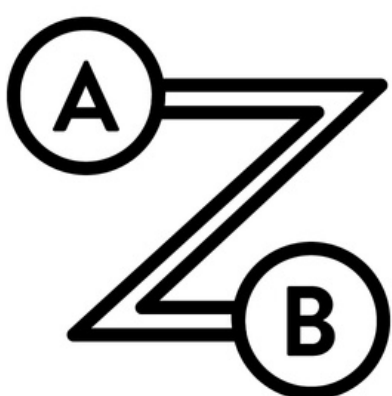

We prepare a Soil Sampling Plan and take samples from across your farm, which are analysed and form the baseline soil carbon levels.

IMPLEMENTATION OF STRATEGY AND PLAN

We work with you every step of the way to implement the farm management practice change, with technical & agronomic support.

3-5 yrs

REVIEW AND ADJUST

As the results of your management changes become evident, we will help you to adjust to ensure maximum benefits.

EDUCATION AND EXTENSION ACTIVITIES

Carbon Sync will provide on-farm and virtual education and support (including peer support) throughout the 25-year project.

SOIL TESTING

After 3-5 years of plan implementation, we re-sample and test your farm's soil to detect changes in soil carbon.

AUDITING AND ACCU ISSUANCE

If your soil organic carbon has increased, we will apply for issue of carbon credits (ACCUs) for you from the CER.

2-4 mths
