

Introducing Zenitel
Turbine Extended Intercoms

Convenient,
Secure Access

Enhancing a visitors' experience and staff admission

Drawing on advancements in intercom technology and responding to customer requirements, Zenitel's new Turbine door entry Intercoms offer ease of use, maximum reliability and peace of mind.

We're proud to be at the forefront of intelligent intercom communication. Through our innovative design and cutting-edge features, we ensure reliability and minimize security risks, whatever the environment.

Each door station within our Turbine series benefits from the latest technology while our 70+ years of experience in the audio communications industry guarantees Superior Audio and Video Performance.

Hassle free access control

With our new models, our Turbine Extended Intercoms is the perfect solution for entrance points that necessitate staff authorization at doorways and barriers, as well as visitor management at multi-tenant properties.

Most importantly, our models is designed to keep your visitors and employees safe at all times by ensuring you convenient and secure access.

Secure Access at your fingertips

Enhancing visitors experience and providing convenient and secure entry, through best-in class audio and video performance with hassle-free access control.

Simplified Access at your door

Convenient admission and secure access by combining best-in-class audio and video communications with a card reader of your choice. By merging the intercom and access reader, we successfully reduced the amount of equipment required at the doorway.

- Supports HID & Elatec++
- Your freedom to select 3rd party accessories
- No need for separate card reader mounting products

Designed to be relied upon

Communication solutions engineered for high availability, even in the most demanding environments.

- Designed with Long lifetime components and up-to-date technologies
- Proven track record of long-term support of system & devices

Turbine Extended products

TEIV-1+ IP Video Intercom with keypad

Full keypad entry

There's no need for expensive touchscreens or complex programming with our TEIV-1+ full keypad, which is an ideal solution for employee-only areas at high-security settings. Simply use your unique 6-digit PIN code to gain access.

Scroll and display

Visitor management at multi-tenant buildings is hassle-free, thanks to the TEIV-1+ address book. Use the intuitive scroll keys to search for a contact in the address book for easy access using the tenant's short-number.

TEIV-4+ IP Video Intercom with card reader mount

Streamline doorway security

Unique to the TEIV-4 is a RFID card mount that enables easy integration with leading third-party card readers such as HID and Elatec.

Reduce entry point equipment

By combining the intercom and wireless access, the amount of equipment required at the doorway is reduced while still providing users with a communication solution for any situation.

Cybersecurity to keep systems safe

Cybersecurity compliant

When developing products, Zenitel always meets stringent IT requirements for mission-critical systems. Our Turbine intercoms are not only highly reliable and maintainable, but also provide defence from cyber threats and attacks.

CIS SecureSuite membership

Through our membership, we further strengthen our cybersecurity defenses by leveraging CIS SecureSuite resources, including CIS Benchmarks, security configuration resources and CIS Controls, to ward off today's most pervasive cyber-attacks.
