

Steven Davies

Steven is a seasoned executive strategy consultant with deep knowledge of the Software Defined World from Data Center and Networks through Cloud and Migration. His well-balanced cross-domain experience has defined him as an industry-known leader helping to guide companies through their cloud and modernization journeys. Through technical and organizational transformations Steven has been the go-to capital knowledge base enterprises rely.

Steven has established companies from inception to growth and acquisition such as Global Online Japan (CTO), Exodus Communications (CTO), Silverback ASP (CEO), Accenture (MD), STT GDC (SVP), STT Connect/Leap/Cloud (Founder), and Advisory Board member for several companies. Currently, Steven is the Chairmen and Founder of the Data Center Association of the Philippines (DCAP.ph)

Steven has created a migration consulting methodology that is followed by many large System Integrators, and he continues to shape the IT market through his Hybrid Cloud and Infrastructure strategies and roadmap.

His latest book 'Infrastructure Modernization', already referred to as the Holy Grail for CIOs, will be coming out in 2023

Key Passion: Thinking outside the typical norms to create business solutions building roadmaps and designs while innovating and executing technical strategies
