Prepare to answer questions.

Do not memorize, just

prepare

Prepare your stories to illustrate your answers with examples. Make sure you cover all categories

Detailed next

How to prepare your stories to answer fit questions

Context Objective and implications Your role decisions Result

- Share the initial context to your interviewer
- It should be short and clear, but you want to give visibility on what you want to explain

Ensure the interviewer has enough context

- Define the objective of the story. It could be an issue, challenge, target, etc.
- Share the potential impact of not achieving or solving it

Hype the interest with the objective

- Establish what was your role to accomplish the objective
- Share your individual contribution, but don't forget the overall group

Make it clear that you are part of the story

- Describe the specific actions and decisions to accomplish the objective
- If possible, share the reasoning behind them

Be clear on what happened

- Explain the results and outcomes obtained
- If possible, share some numbers to illustrate them

Highlight the results, with numbers (if possible)

When you explain your story, link it to the initial question

Last but not least, your questions for the end of the interview (Q&A section)

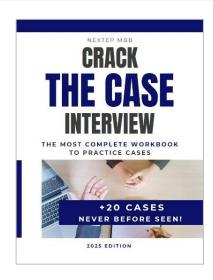

Do

- 1. Prepare all the questions you have about the firm, the office, the job, etc. They should be genuine and sincere questions
- 2. Answer them with the interactions you have, both formal and informal interactions
- 3. Update your list of questions with new ones
- 4. Save one or two of them for each interview
- 5. Once you receive the answers, participate and deep dive
- **6. If you don't have questions, it's fine**. Just tell the interviewer the main interactions you had and give her back 5 minutes

Don't

- Ask because you have to ask, because is the Q&A
- 2. **Don't listen** during the answer because you are thinking about the case
- 3. Take much time from the interviewer

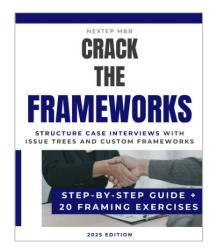

Additional resources to crack cases, frameworks...
