

# HOW TO USE THE TEMPLATE

---

## HAND DRAWN ZINES

1. Set your print scale to **"Fit to paper"** **when printing templates** - If you don't your pages will have a tiny line of text at the bottom to change the scale
2. **De-select "Print on both sides"** or **select "1 Sided print"** - you want each side of the template on different sheets to prevent bleed through
3. Select the **highest resolution** print you are able to
4. **Print it**
5. Fill in your blank template according to the instructions on the following pages (they are also on the layout guide itself)
6. Scan your compiled zine - highest resolution (dpi) you can select on your scanner

**And you're done!**

- **Don't want to print the instructions or layout guide?**
  - Print only pages 8 & 9
- **Want two blank templates?**
  - Print out page 9 Twice - **If you're submitting to Coven Press, please don't do this**; we need the space on the back cover to plug operation newsstand

# HOW TO FORMAT ORIGINALS

---

- Please **number at least pages 2, 4 & 6** for ease of assembly - other pages optional
- Please **do not write in the grey cross** margin, the libraries need wiggle room to align and re-format
- You **may want to leave a 1/8" in scanning margin** around the sheet to prevent cutoffs

# HOW TO ASSEMBLE PRINTS

---

1. Print the Zine "**Fit to Printable area**" for assembly
2. Cut along **the shorter dashed line**
3. Cut the **dashed lines on the two halves** you made
4. **Fold each stack** of leaflets on the middle of the three lines with the **Cover, Pg 2, Pg 4, Pg 6** on the outside
5. line up your folded stacks, left->right: **Cover, 2, 4, 6**
6. Then, right->left: **6 inside 4, both inside 2 & all those inside the cover**
7. Crease the spine with bone folder
8. Staple along the spine lines
9. Trimming optional - looks nice tho

Check out "Be a Zine Newsie - Digital Zine" for illustrations! - [opstand.net/print-zines](http://opstand.net/print-zines)

# HOW TO TRIM ZINE PRINTS

---

1. Place Spine of your stapled zine against the backboard of your cutter
- 2. Trim the top edge**
3. Rotate so the top edge is against backboard
- 4. Trim long edge up to the edge of the cover**
5. Rotate so long edge is against backboard
- 6. Trim the protruding bottom pages**

## EFFICIENT ASSEMBLY TIPS

---

- Cut your prints all at once using a paper cutter - one cut at a time takes longer
- Keep your cut leaflets in stacks so you can fold them all at once
- Put all of the pages from each zine in a stack together before creasing, then stapling each

**The more of one step in the folding process you do at once (or better yet, in one motion) the faster your production will be** - it is a huge time sink switching between tasks to finish one zine at a time or doing the same task multiple times when they could be combined into one motion - like folding the stacks.

## Efficient Assembly

- Cut your prints all at once using a paper cutter - one cut at a time takes longer
  - Keep your cut leaflets in stacks & fold them at once
  - Put all of the pages from each zine in a stack together before creasing, then stapling each
- The more of one step in the folding process you do at once (or better yet, in one motion) the faster your production will be** - it is a huge time sink switching between tasks

# LAYOUT GUIDE

— Page numbers required for eas assembly

**This is not a zine, keep it flat for use as a reference :)**

## Making Originals

- Please number at least **pages 2, 4 & 6** for ease of assembly
- Please **do not write in the grey cross margin**, the libraries need wiggle room to align and re-format
- You **may want to leave a 1/8" in scanning margin** around the sheet to prevent cutoffs (if you plan on scanning a physical original copy, this does not apply to digital artists)

## Trimming Prints

1. Place Spine of your stapled zine against the backboard of your cutter
2. **Trim the top edge**
3. Rotate so the top edge is against backboard
4. **Trim long edge up to the edge of the cover**
5. Rotate so long edge is against backboard
6. **Trim the protruding bottom pages**
