

Agami Education Foundation

A voluntary organization devoted to promote education for underprivileged children of Bangladesh

58 Lake Circus, Kalabagan, Dhaka - 1205, Bangladesh

Organization: Agami Education Foundation

Program: Agami EdTech

Job Title: Content Developer

Job Type: Part-time/Freelance (contractual)

Salary: BDT 10,000-15,000/-

Vacancy: Several

Organization Profile:

Agami (www.agami.org) is a non-profit organization, dedicated to promoting education for the underprivileged children in Bangladesh. Agami was founded in the USA in 2003, and Agami Education Foundation is a sister organization with offices in Dhaka, Bangladesh. Agami works with primary and high schools across Bangladesh. In addition to providing basic support to ensure an academically enriching and welcoming environment in these schools, Agami firmly believes in bringing the latest innovations in education technology to the underprivileged children in Bangladesh. Agami's EdTech Program as described below is one such key initiative.

Program Profile:

Agami launched its first EdTech intervention in 2011, with the goal of bringing the much-acclaimed Khan Academy (www.khanacademy.org) educational videos and other resources to the underprivileged students in Bangladesh. In March 2016, the Khan Academy Bangla website (bn.khanacademy.org) was launched with support from Grameenphone. We continued developing our own videos, exercises and other educational content. In partnership with Learning Equality (www.learningequality.org), we are introducing their offline education platform called Kolibri with our developed content to schools across Bangladesh. Additionally, we are building partnerships with bodies like UNICEF, World Bank, A2i, BRAC to contribute to the national effort to develop the competency level of our students and teachers.

Position Overview:

We are currently seeking a few Content Developers to join our EdTech team as part-time contractual staff of Agami Education Foundation in Dhaka, Bangladesh. The primary responsibility of these positions will be to support the educational content development activities of different projects.

Scopes of Content Development:

The team is currently working on three specific areas of secondary Mathematics and Science:

1. **Video content creation (non-human appearance):** Videos where topics are explained to support the learner.
2. **Practice problem-solving (exercises) and article creation:** Problem-solving exercises that consist of a set of problems with step-by-step rationale to help the learner practice the topic and earn competencies.
3. **Localization:** Localizing exercises and articles for local use and for the platform

If you are creative, enthusiastic about educational content development, and have a passion for promoting education for all, we encourage you to apply for any of these opportunities.

Please note that it is up to you to decide where your priorities and interests lie. You are welcome to try any combination of the three roles, whether it's one, two, or all three. We suggest showcasing your strengths wherever they may be.

Responsibilities:

- Generate creative ideas for engaging and interactive digital learning materials.
- Develop digital educational content (videos, exercises, and localization) on Mathematics, Language, Science, and ICT for both primary and secondary level students.
- Explore relevant content and thorough research of NCTB books to ensure the accuracy and relevancy of content.
- Collaborate with subject matter experts and instructional designers to create curriculum-aligned educational content.
- Share insights with the content team and improve based on feedback.
- Develop and maintain consistent, clear, and timely communication and reporting for all activities, issues, and updates with the relevant personnel in Agami EdTech.

Requirements:

- Must have a science background, with Mathematics and/or Physics at the higher secondary (or equivalent) level.
- Graduates or undergraduates from any discipline may apply; preference will be given to candidates from STEM fields (Science, Technology, Engineering, or Mathematics).
- Knowledge of curriculum and contemporary EdTech content is preferred

- Highly motivated and interested in “access to learning for less privileged community”
- Ability to work independently and as part of a team

Benefits:

- Your Remuneration will be -
 - BDT 10,000/month (8 day/month)
 - BDT 15,000/month (12 day/month)
- Remuneration can be negotiated for experienced individuals
- Work days can be any day from Saturday to Wednesday
- No festival bonus is applicable for this employment

If you are creative, enthusiastic about educational content development, and have a passion for promoting education for all, we encourage you to apply.

Application Deadline: 22 July 2025, 11:59 PM (BD Time). Early applications are strongly encouraged.
