

Planets of the Solar System

Explore the wonders of space with Captain Nova!

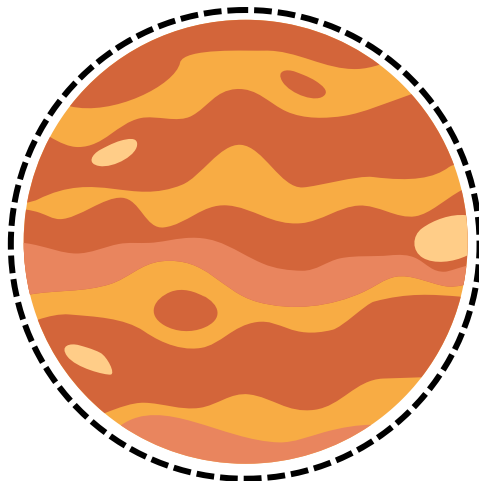

Cut out the planets and sun, then build a solar system

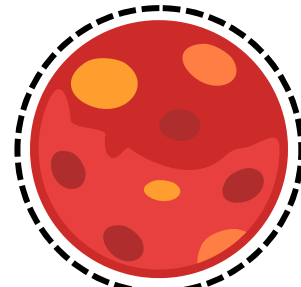

EARTH

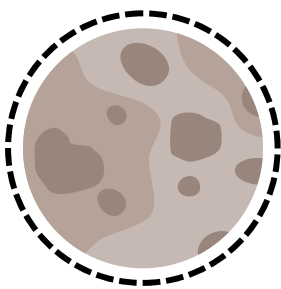

SATURN

JUPITER

MARS

MERCURY

VENUS

Fun Fact:

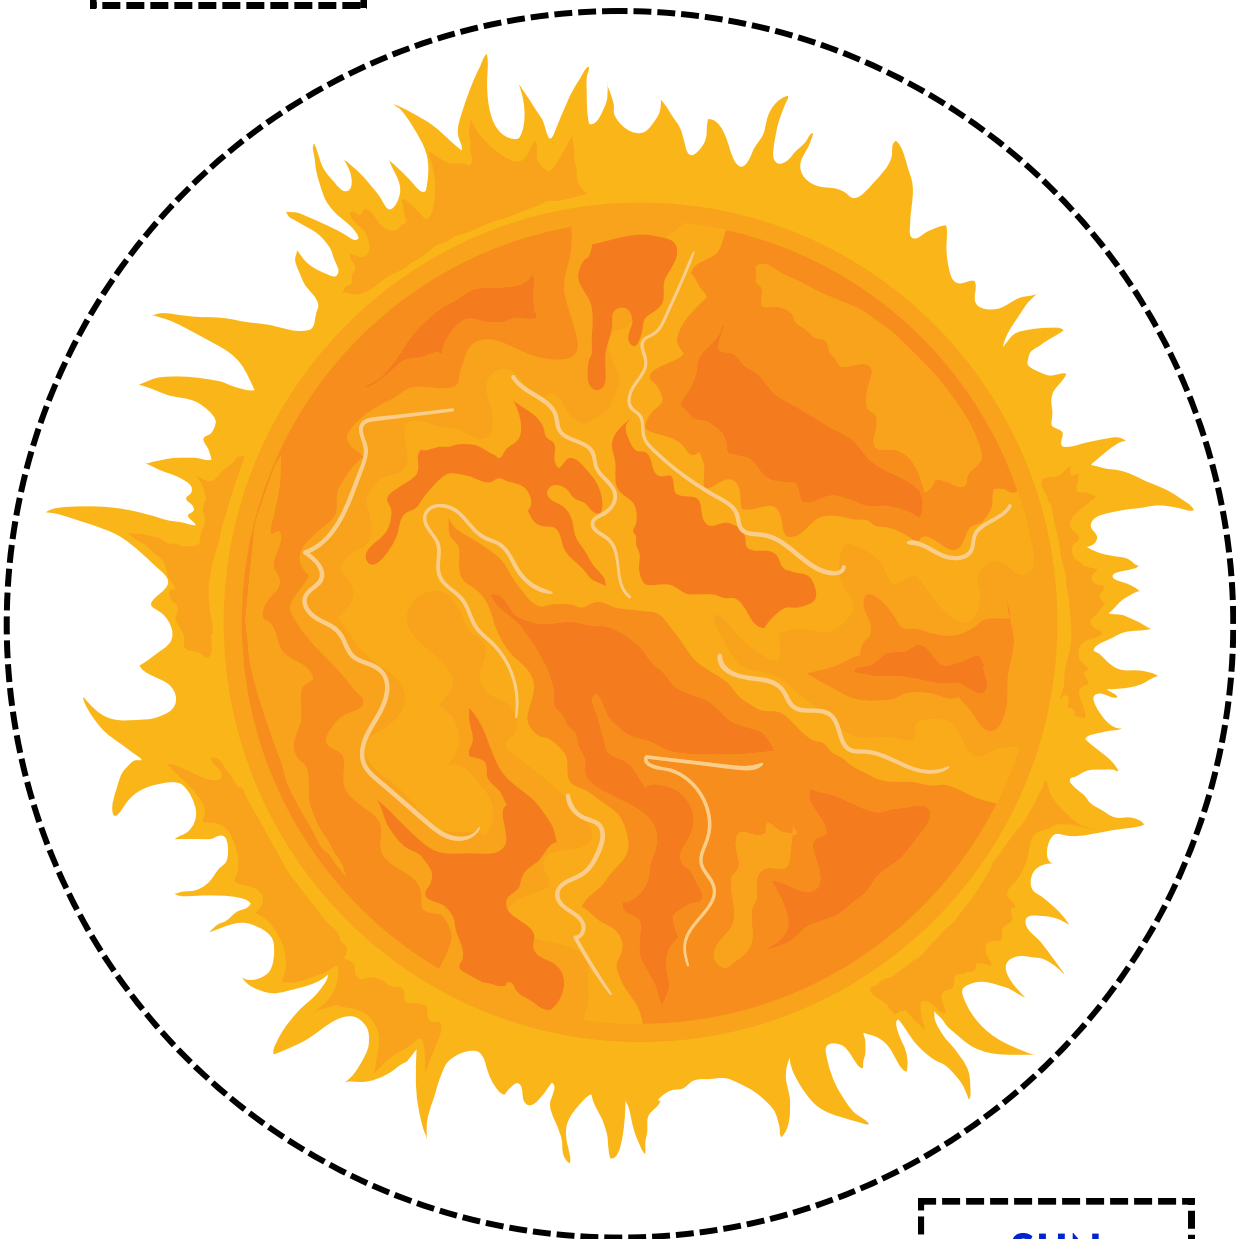

Did you know? Jupiter is so big you could fit 1,300 Earths inside!

URANUS

NEPTUNE

SUN

☀️ Captain Nova's Mission Orders ☀️

✂️ Cut out the Sun and all 8 planets.

🪐 Line them up in the correct order:

Mercury

Venus

Earth

Mars

Jupiter

Saturn

Uranus

Neptune

🔪 Glue or tape them onto paper, cardboard, or a poster board to build your own solar system.

✨ Draw the orbits as circles around the Sun, then place each planet on its path.

🚀 Add extra space fun! Stars, moons, or even me, Captain Nova, flying by!

✅ Mission Complete

Great job, Space Scout! You've built your very own Solar System. 🌌
